- 1 Double-click the HTML file** — it opens in any browser. Nothing to install, nothing to create.
- 2 Pick a game** from the 200-game library — filter by skill or level, or hit ► Continue where you left off.
- 3 Fill the blanks** from the picture word bank and check — instant feedback, points, and progress recorded automatically.

Note about the voice: The game uses your browser's built-in speech synthesis, selecting a suitable English voice when available and adjusting its pitch and speed. This creates a child-friendly style, but it cannot guarantee a real child's voice; the sound quality depends on the voices installed on your device.
