

Student Data Dashboard

Six domains of reading, math, and sight-word data - one class-wide view.

HOW TO USE

1. Roster

2. Data

3. Overall Band

4. Tier (optional)

5. Dashboard
- Add students in the Roster tab - they appear in Data automatically.

Enter each student's % scores for the 6 domains (write 0.5 or 50%). Domain averages and the Overall % compute automatically.

Auto: Mastered (80%+), Developing (40-79%), At Risk (below 40%).

Tag students Tier 1 / 2 / 3 using whatever fits your MTSS process - the Dashboard counts them.

Class averages, mastery-band picture, and the domains where the most students sit below 50%.

THE 6 DOMAINS

- Reading

Math

Sight Words
- Phonics, Fluency, Comprehension

Number Sense, Arithmetic

First 100 Fry words, % known

SMART TIPS

- Enter percents as decimals

Update after each screener

Zero data is fine
- 0.5 works, and so does typing 50% - cells keep the 0% format.

The Dashboard, charts, and every count refresh the moment a score changes.

Blank cells are simply ignored - averages and counts only use what you have entered.

COLOUR LEGEND

- Green

Yellow

Red
- 80%+ - Mastered

40-79% - Developing

Below 40% - At Risk / priority support
