

SEASHELLS

Is exploring seashells

Fascinating Facts about Shells

Interesting things about shells

- A sea shell is a hard outer layer made by an animal that lives in the sea.
- Most shells are mollusc shells.
- The shell is part of the body of the animal.
- Empty seashells are often found on the beach.

Why are some shells empty?

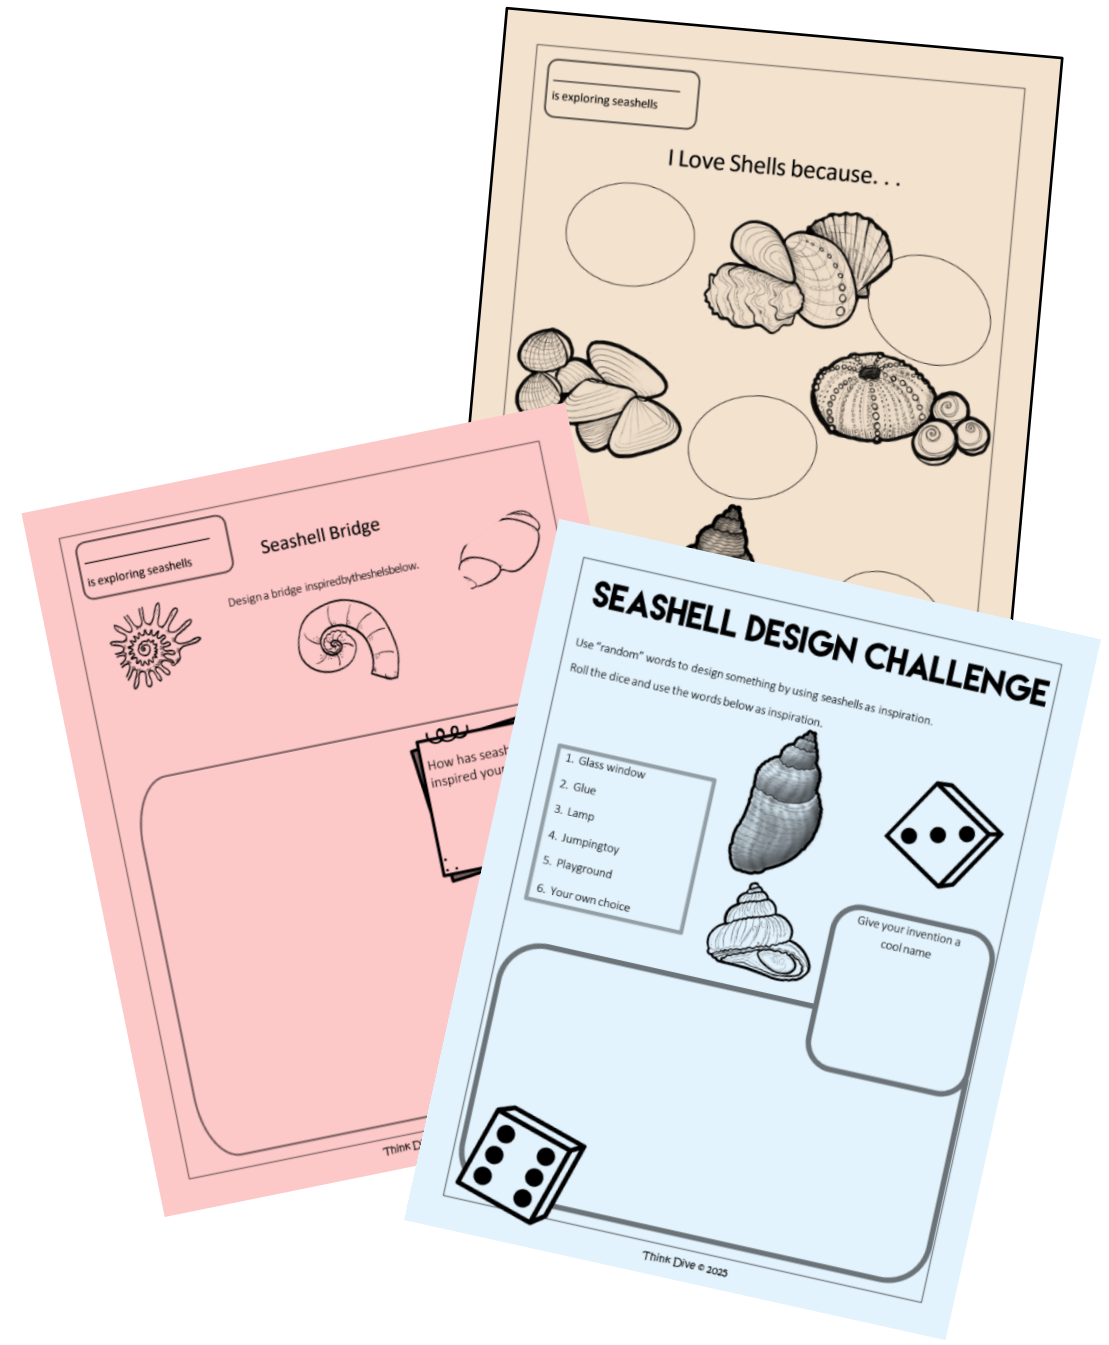

When can you pick a sea shell?

Explore Unique Shapes: Encourage students to investigate the diverse forms of seashells and their adaptations.

Understand Colors and Textures: Explore the vibrant colors and textures of shells and discuss their ecological significance. Explore bioluminescence.

Foster Curiosity: Inspire students to ask questions about marine life and the role of seashells in the ecosystem.

Design and Problem-Solving: Guide students in using their observations to create innovative designs inspired by nature.

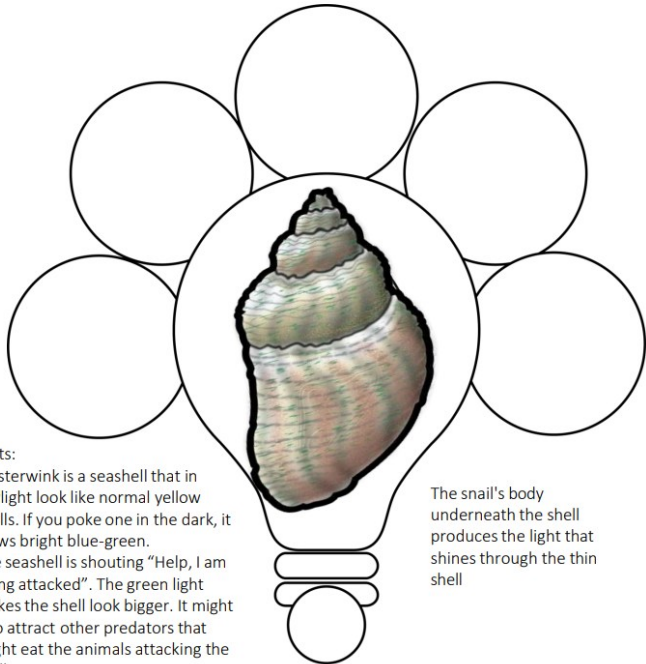

Great to Use for

- ❖ Sea & Ocean Units
- ❖ Beach Theme
- ❖ Summer Units
- ❖ Nature studies
- ❖ Critical & Creative Thinking
- ❖ Biomimicry Units
- ❖ Summer Camps

Light Dance—Seashells

Make a mind map of seashells that make light.
How do they make light?

Facts:
Clusterwink is a seashell that in daylight look like normal yellow shells. If you poke one in the dark, it glows bright blue-green. The seashell is shouting "Help, I am being attacked". The green light makes the shell look bigger. It might also attract other predators that might eat the animals attacking the shell.

The snail's body underneath the shell produces the light that shines through the thin shell

Reviews

“Wonderful resource! My students had a blast and the resources were well created!”

“This was very engaging for my students. Thank you for creating such a quality resource!”

“This is awesome! It's perfect for my kinesthetic students who love to create and manipulate things in order to learn and it's great for my critical thinkers! It's also well organized and easy to follow. Thank you so very much!”
