Printer- Friendly

WHAT'S INCLUDED:

WILDFIRES AROUND THE WORLD

THINKING CHALLENGES

1. Which animals stay and hide, and which ones run away? What might decide that choice?
2. Three regions have plants whose seeds actually need fire. Why might a plant "want" to be burned?
3. The Amazon is different from the other regions. What does that tell you about which ecosystems are naturally fire-adapted — and which are not?

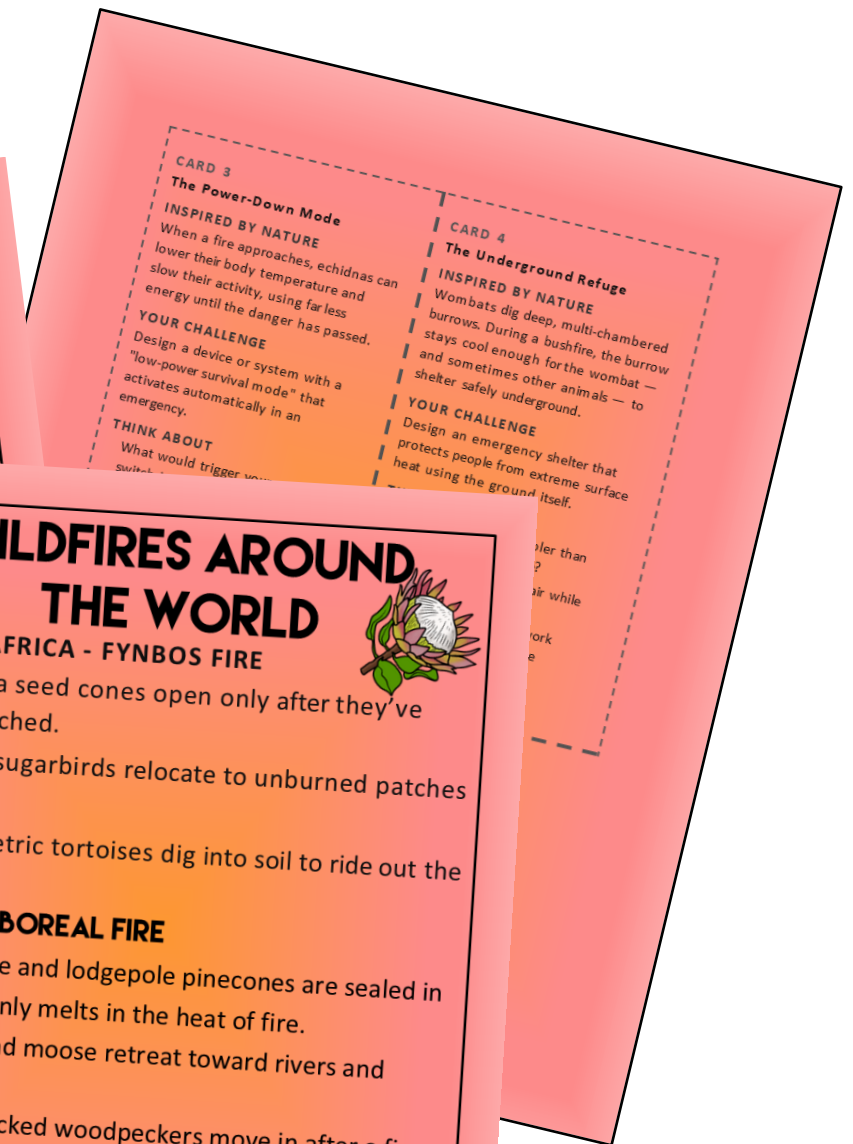

Think DIVE © 2020

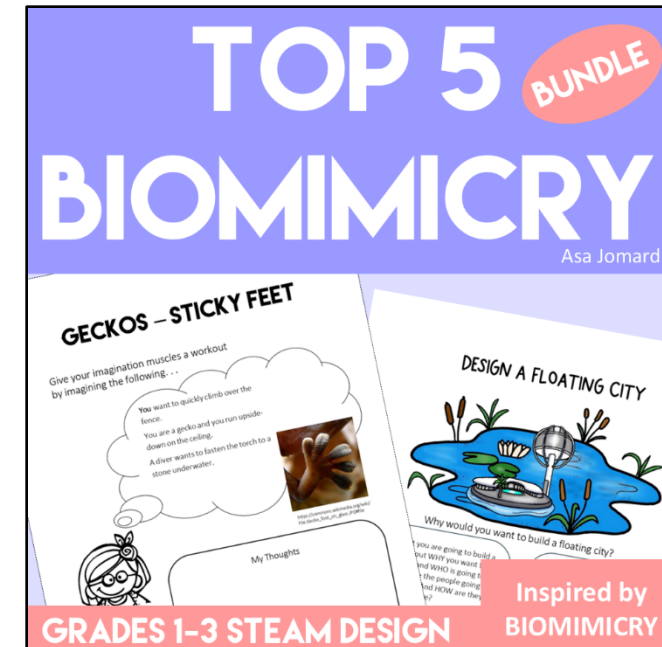

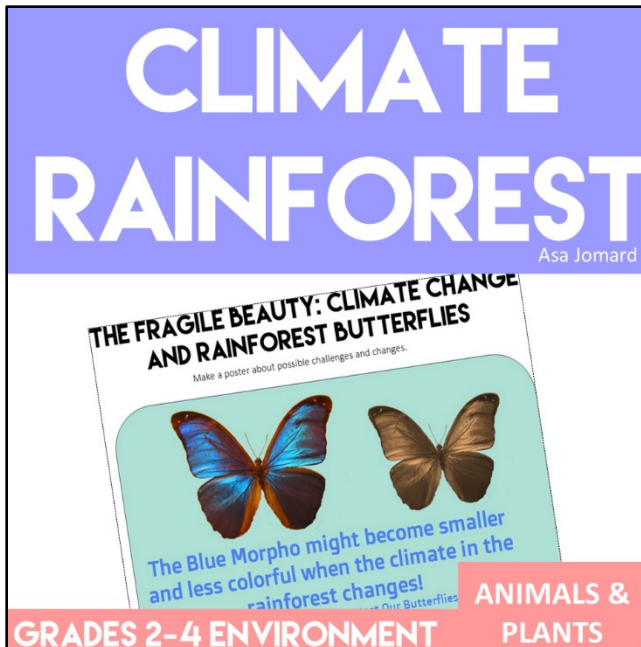

Three posters.
Discussion starters
Six STEAM/Biomimicry
Challenges Task Cards

Ways to Use

- Discussion starters
- Science centers
- Classroom decorations
- STEAM/Biomimicry Projects & Research
