- Early finisher activities
- Review and practice
- Assessment preparation
- Small group instruction

11

Solve the expression by following the order of operations. Always perform the operations inside the parentheses first. Then continue with multiplication and division from left to right, and finally addition and subtraction from left to right. Show your work carefully!

$$(5 \times 3) + 12 \div 4 - 7 + 6$$

© Asa Jomard

12

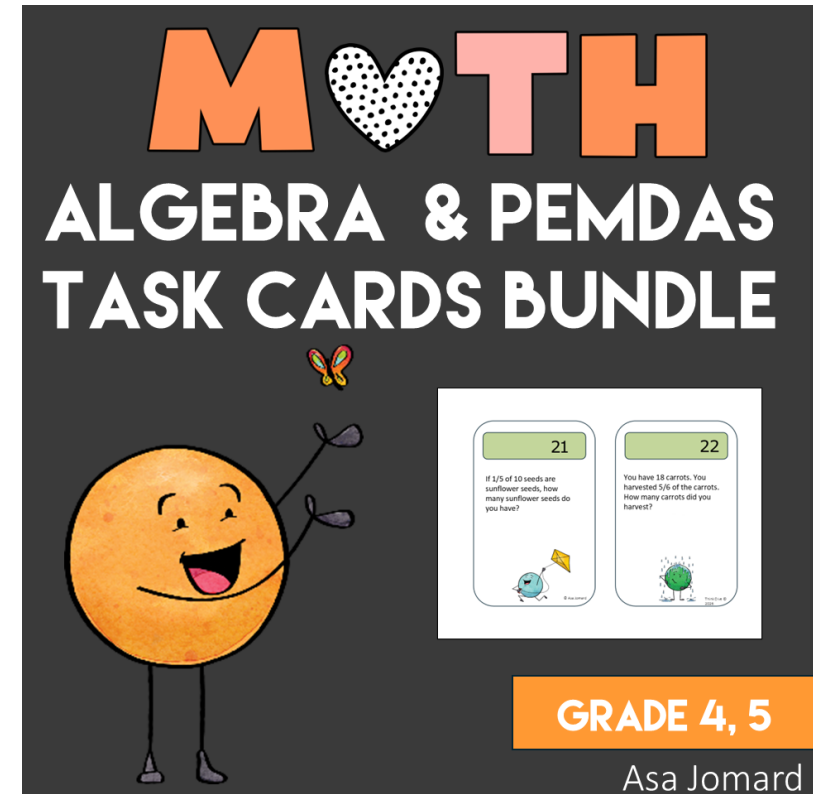

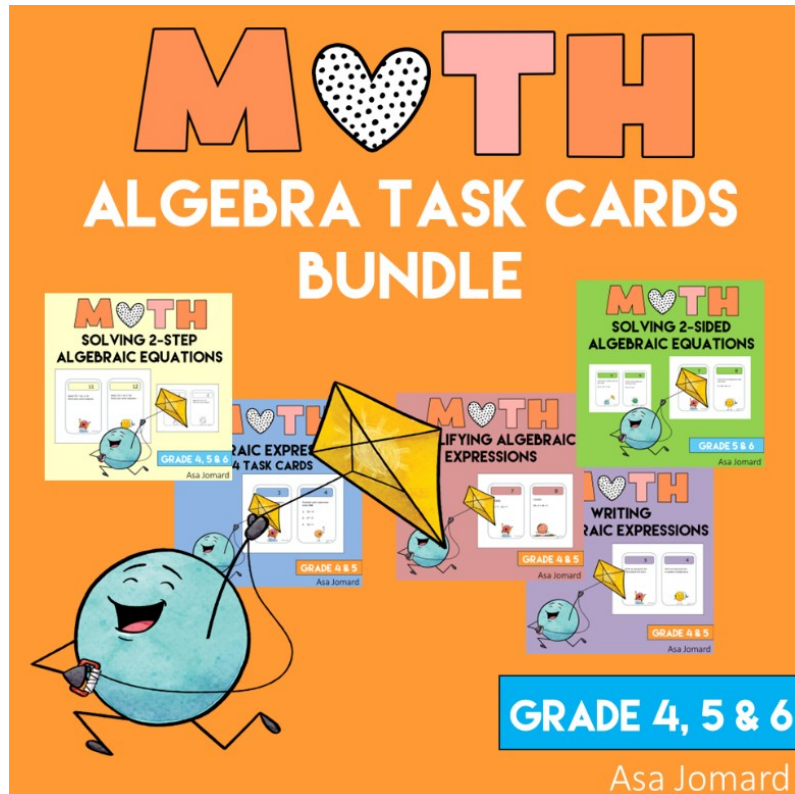

Solve the expression by following the order of operations. Always perform the operations inside the parentheses first. Then continue with multiplication and division from left to right, and finally addition and subtraction from left to right. Show your work carefully!

$$14 + (8 - 3) \times 2 - 10 \div 5$$
