

ENGAGING OWL PROJECTS

COOL FEATHERS

Owl Detective:

Facts about Feathers
Owls have five different types of feathers. Owls' feathers are larger than the average bird's feathers.
They have contour feathers that cover their body, wings, and tail. Soft and fluffy down feathers help keep them warm. Semiplumes fill in between contour and down feathers. Bristles are small feathers with barbs only.
Filoplumes are hairlike feathers. Owls have them on their feet and bill. These feathers work like feelers, helping them when they touch things.
The surface of owls' flight feathers is smooth, which helps to reduce noise when they are flying.

Why is it good for owls to be able to fly without making any noises?

My feather gallery
Draw some interesting feathers.

Can you make a paper model of a serrated edge with a saw-like edge?

WHAT IF I WAS AN OWL?

Owl Detective:

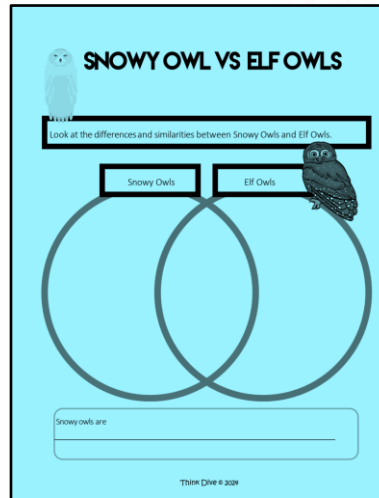

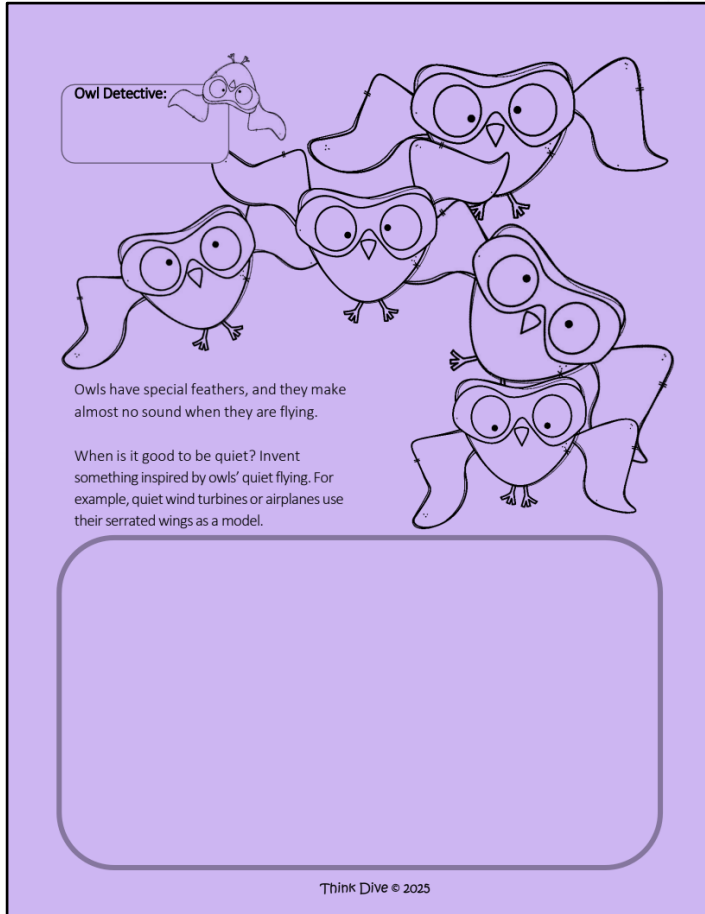

I have big eyes. The big eyes help me to...

Design something inspired by the owl's big eyes. Like a robot that can find things in the dark.

GREAT TO USE FOR

- ❖ Bird Projects
- ❖ Environmental Units
- ❖ Design Projects
- ❖ Centers
- ❖ Independent Work
- ❖ Creativity Challenge

REVIEW S - BATS

"This product is *absolutely the favorite one I have purchased all fall! I love the information that is provided about bats - just enough to intrigue and encourage higher level thinking. There are graphic organizers, worksheets, and subtle suggestions to help young learners perform at their best! And best of all, it stretches their creativity! Thanks for such an amazing resource!*"
