

RABBIT LIFE CYCLE

Wild rabbits are found in meadows, woods, forests, grasslands, deserts, and wetlands.

Fun Facts

1. Rabbits are small mammals in the family Leporidae.
2. A female rabbit is called a doe.
3. A male rabbit is called a buck.

4. A young rabbit is called a kit or kitten.
5. Rabbits have whiskers that are the same width as their body.

6. Rabbits live in the wild but also make great pets.

7. Rabbits are burrowers. They live in underground burrows or dens.

8. In the wild, rabbits build a network of burrows. This network is called warren.

9. Rabbits have long ears and powerful hind legs.

10. Rabbits are Crepuscular. They are most active in the twilight hours of both sunrise and sunset.

11. Flemish giant is one of the largest breeds of domestic rabbits. The longest rabbit in the world was 4 feet 3 inches long (130 cm).

How does a rabbit know if it fit through a hole and not get stuck in tunnels?
