

DRAGONFLY LIFE CYCLE

Wandering Gliders—the world's longest distance

Globe skimmers is a type of dragonfly that are found on all the continents except on Antarctica. They also called wandering gliiders which is a perfect name since they make the longest journey of any insect. Four generations of dragonfly make an annual journey of some 18,000 km. from India to Africa. They stroke their wings a few times and then glide for long periods. This means that they are using little energy when they are traveling.

Can you mark the wandering gliders journey on the map below.?

WHAT IS INCLUDED

Explore the Life Cycle

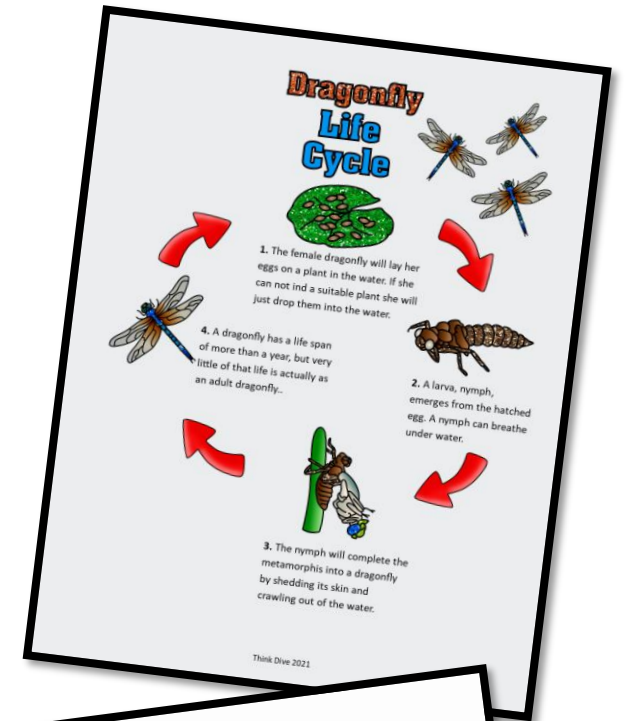

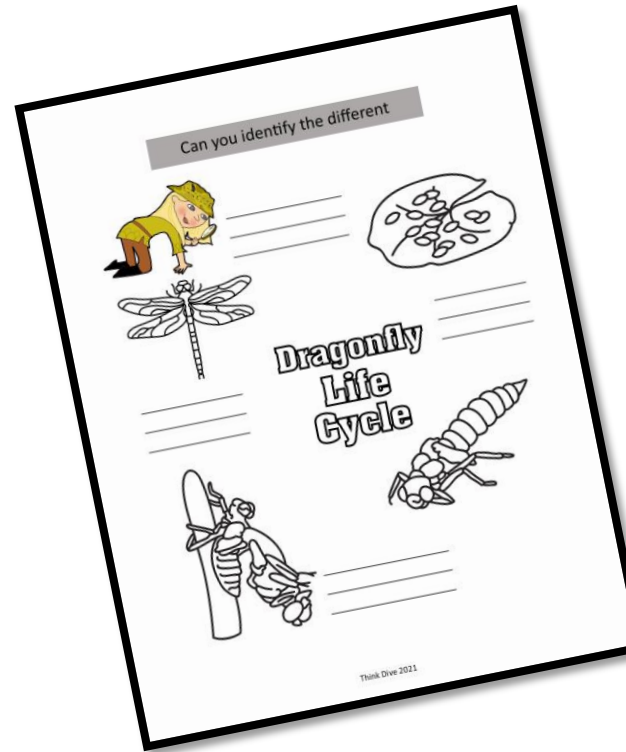

Life Cycle Cards

Poems, Story Writing

Dragonfly Superpowers

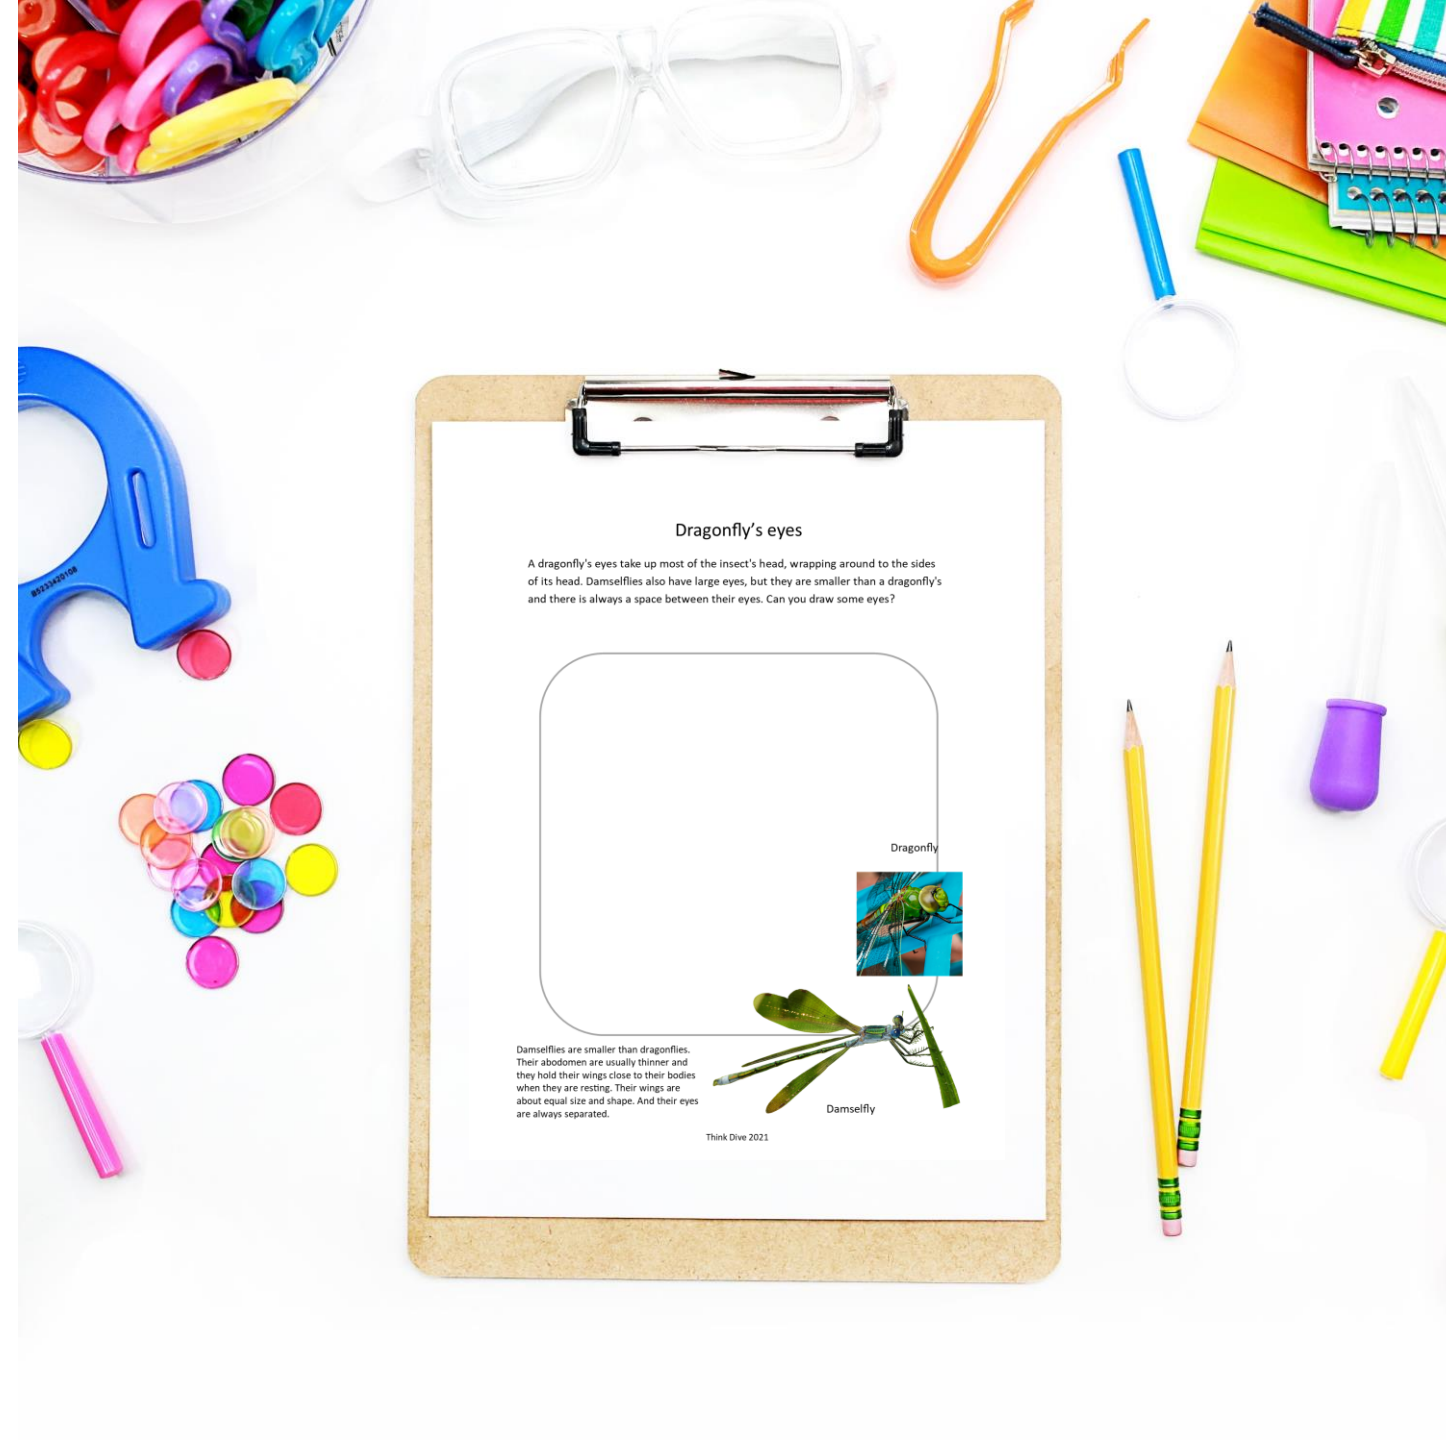

Imagination Challenges

Design Challenges Inspired by Nature

GREAT TO USE FOR

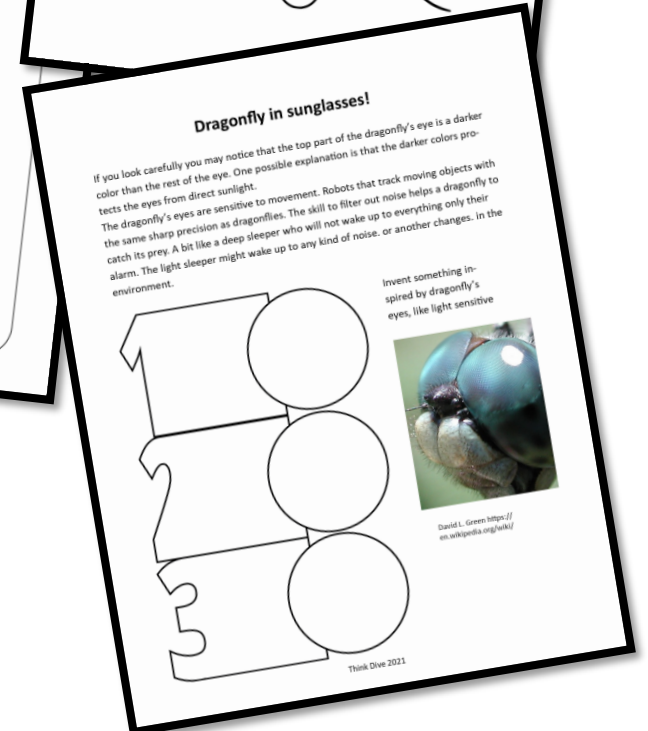

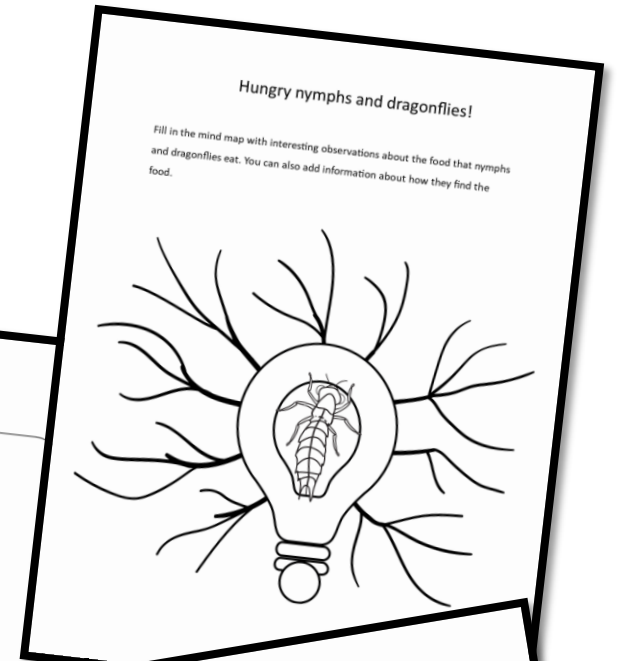

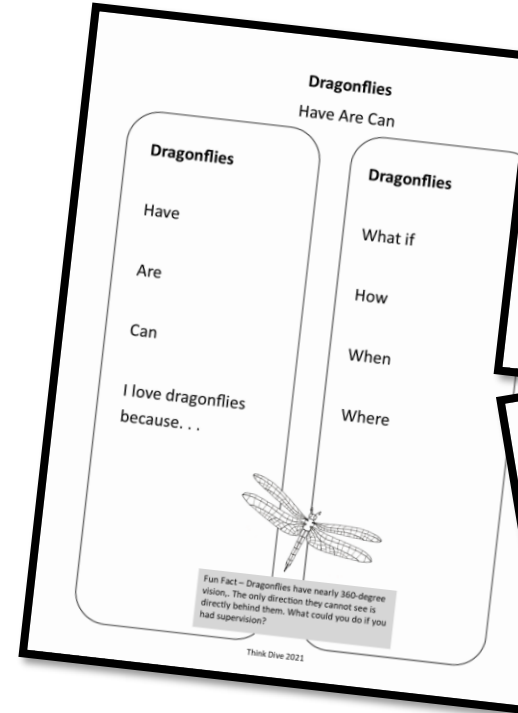

- ❖ Animal Units
- ❖ Nature Projects
- ❖ Insect Projects
- ❖ Life Cycle Units
- ❖ Centers
- ❖ Independent Work
- ❖ Creativity Challenges
- ❖ Distance Learning
- ❖ Easel Activities included

REVIEWS

Project based learning: Bats, STEAM, Biomimicry

"This product *absolutely the favorite one I have purchased all fall! I love the information that is provided about bats - just enough to intrigue and encourage higher level thinking. There are graphic organizers, worksheets, and subtle suggestions to help young learners perform at their best! And best of all, it stretches their creativity! Thanks for such an amazing resource!*"
