

FROGS BIOMIMICRY

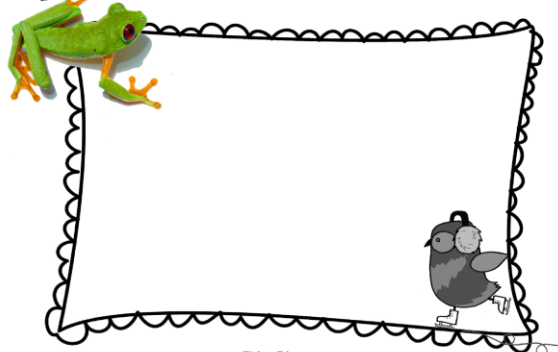

A collage of images related to a frog biomimicry project. It includes a bowl of colorful markers and scissors, a pair of glasses, a stack of colorful notebooks, and a hand using a purple tool to work on a surface. In the center is a worksheet titled "FROGS BIOMIMICRY" with illustrations of a girl climbing, a frog, and a shoe, along with text explaining the sticky pads on frog feet and a challenge to create shoes that can hold on to wet and slippery surfaces.

How can you. . .

Tree frogs have sticky pads on the tips of their fingers and toes. The sticky pads help them to climb and to cling on to wet leaves and other smooth surfaces. They can even walk upside down using their suction pads.

How could you make a shoe that can hold on to wet and slippery surface?
How could you make shoes that can help you to walk upside down or climb trees?

WHAT IS INCLUDED

Frog Observations

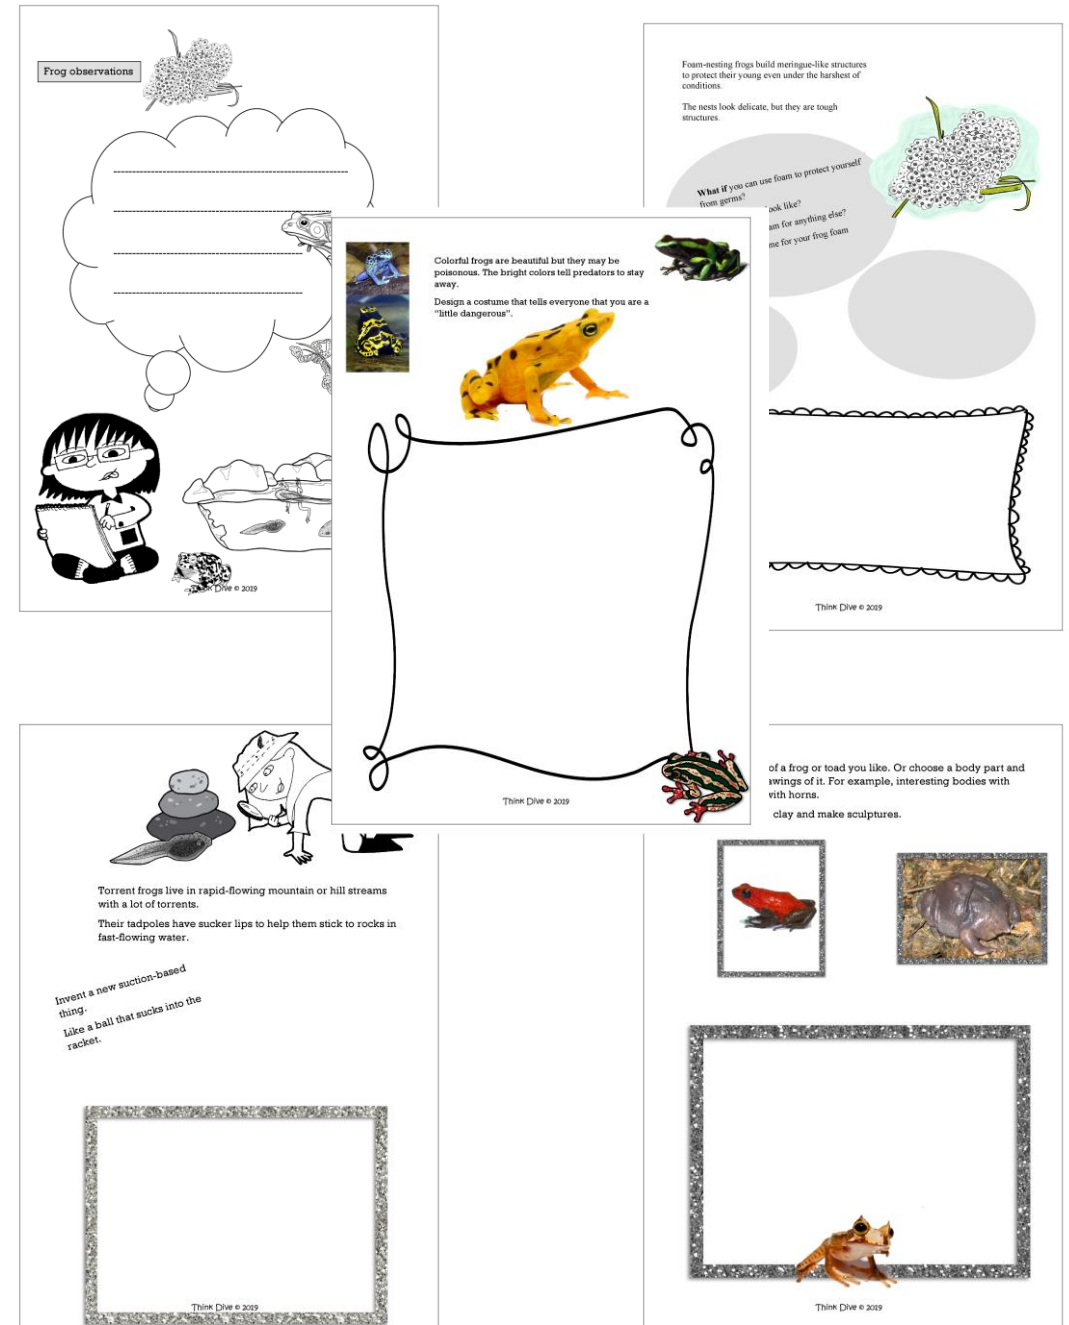

Superpowers

Colorful & Noisy Frogs

Story Writing

Imagination Challenges

Design Challenges Inspired by Nature

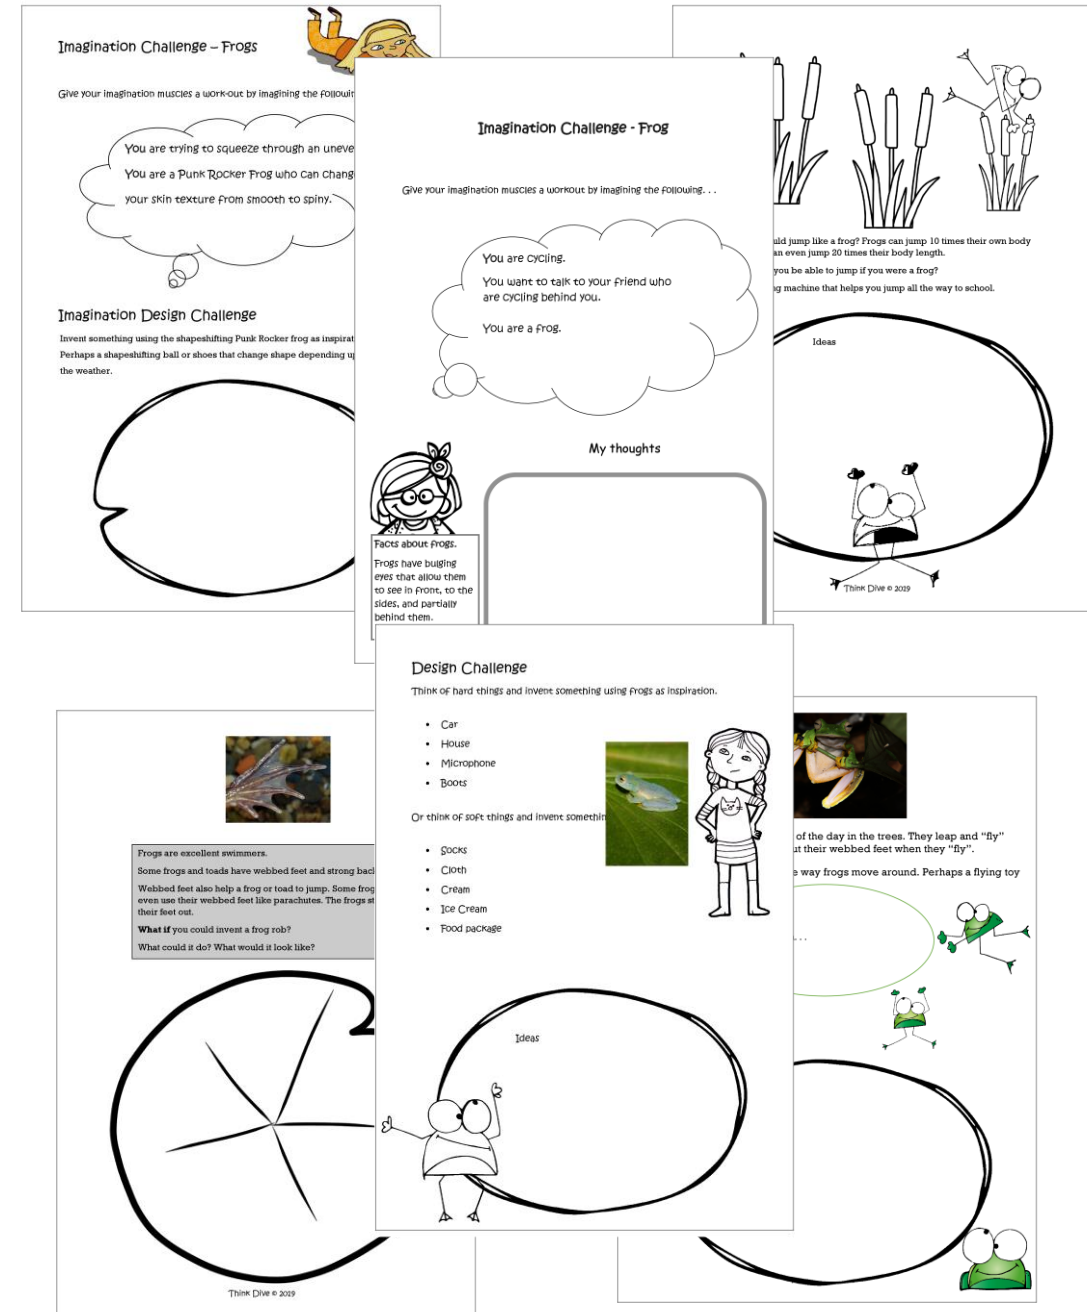

GREAT TO USE FOR

- ❖ Animal Unit
- ❖ Nature Projects
- ❖ Frog Unit
- ❖ Centers
- ❖ Independent Work
- ❖ Creativity Challenges
- ❖ Design Challenges - Biomimicry
- ❖ Distance Learning
- ❖ Easel Activities included

REVIEWS

This is a wonderful resource and I highly recommend upgrading to the amphibian bundle as you will want the set. All high quality and with everything you need for their project work. Thank you again!"

"I often study biomimicry with my older students, and now I have something for the younger ones as well! A great variety of prompts that fit in well with my ecology unit."
