FACTS ABOUT TREES

Trees are perennial plants – they live for more than two years.

Some species of trees can live for several thousand years.

The smallest tree is only a few centimeters. The dwarf willow is between 1-6 cm (0.4 inches to 2.4 inches). This tree is found in the Arctic.

Trees soak up rainwater via their roots. The roots of a tree are underground.

Trees are like Earth's sponges.

Wood from a spruce tree was used by the Wright brothers to build their first aircraft – the Wright Flyer.

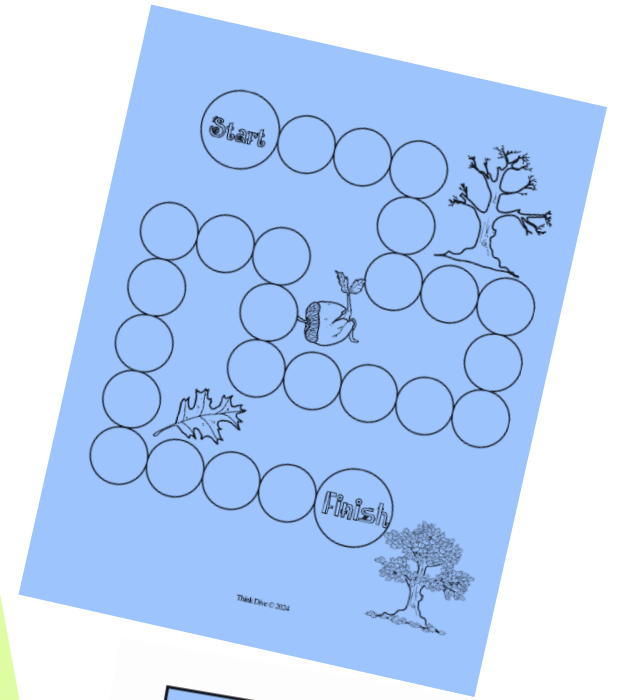

Trees remove CO₂ from the atmosphere.

Trees produce oxygen, which is essential for us to breathe.

Fossils evidence have found that trees have been on our planet for at least the last 370 million years.

Trees are important to battles climate change – they cool Earth's air and surface temperatures.

GREAT TO USE FOR

- ❖ Earth Day Project
- ❖ Environment Project
- ❖ Tree Planting
- ❖ Design Projects
- ❖ Centers
- ❖ Independent Work
- ❖ Creativity Challenges
- ❖ Distance Learning

REVIEWS — REINDEER BOARD GAME

“After the students made their games, I made them explain the rules. This was great for practicing clarity, logical order, and oral skills.”

“My students love games. This was a sneaky way to get them to learn some facts about reindeer.”
