

COLORS IN NATURE

PICK YOUR FAVORITE COLORFUL RED, PINK OR ORANGE ANIMAL

Red dragonfly

Jellyfish

Red poison dart frog

Flamingo

Tiger

Frigate bird

Did you know?

Flamingoes are born gray or white. The food they eat contains a red pigment. The pigment turns the birds' feathers pink. Even their skin turns pink. If an adult bird does not find enough food containing the red pigment, they will turn gray or white again.

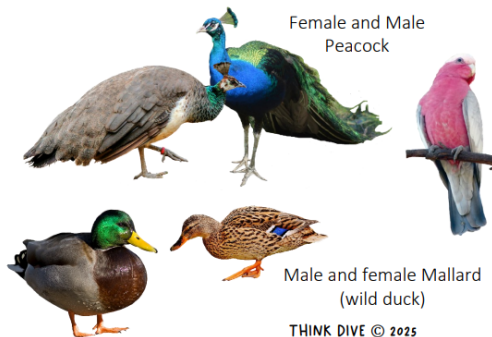

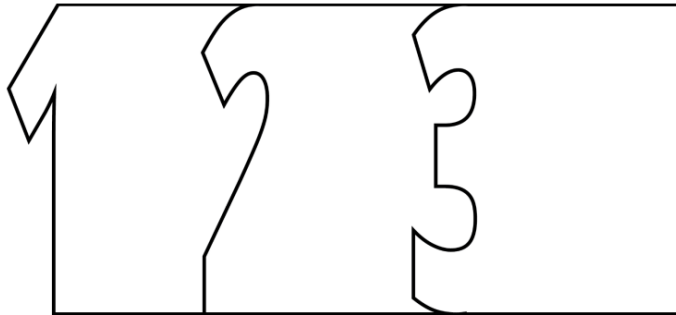

The color red is bold and eye-catching. It can say look at me, or signal danger.

GREAT TO USE FOR

COLORS TO TELL MALES FROM FEMALES

Look for facts about how animals use colors to help tell other animals if they are male, female, young or old, weak or strong.

Female and Male Peacock

Male Galahs have dark brown or black eyes, while females have pink or red eyes.

Male and female Mallard (wild duck)

REVIEW — MATH JOURNAL PROMPTS

“A wonderful set of problems to get students thinking; and I love the extra challenge provided by showing their work to explain how they arrived at the solution. Thank you for the great prompts!”

“I sent this booklet home for parents to help one of my students. It was easy to put it together. Thank you!”
