The image displays a collection of educational task cards for time-telling. The cards are designed with colorful borders and include various clock faces (both analog and digital) and questions. A student answer sheet is also shown, providing a structured way to record responses. A central card titled "What Time Is It? Task Cards" outlines the topics covered: Analog & Digital, Hour, Half Hour, and Future Time.

Task Card Questions:

- What time is it?
- What time will it be in a half hour?
- What time will it be in one hour?
- Digital or analog?
- To which number is the hour hand pointing?
- To which number is the minute hand pointing?

Student Answer Sheet:

What Time Is It? Task Cards

- Analog & Digital
- Hour
- Half Hour
- Future Time

How To Play "Dawn!"

- 2 Players, each player needs their own stack of cards. (not mixed together)
- Choose one color of cards (i.e. only analog clock, only written, or only digital)
- Turn all cards so they are facing down in one stack. (each player has own stack)
- Players turn over one card at a time at the same time to reveal their cards.
- The player with the earlier time says, "Dawn!" and wins both cards. (If 12 o'clock is considered the earliest card.)
- If a player picks "Midnight!", halves must give the other player two cards.
- If players show the same card at the same time, then both players put all their cards back in their own pile to be drawn again.

How To Play "Dusk!"

- 2 Players, each player needs their own stack of cards. (not mixed together)
- Choose one color of cards (i.e. only analog clock, only written, or only digital)
- Turn all cards so they are facing down in one stack. (each player has own stack)
- Players turn over one card at a time at the same time to reveal their cards.
- The player with the later time says, "Dusk!" and wins both cards. (If 12 o'clock is considered the latest card.)
- If a player picks "Midnight!", halves must give the other player two cards.
- If players show the same card at the same time, then both players put all their cards back in their own pile to be drawn again.

How To Play "Midnight!"

- 2-4 Players, each player needs their own stack of cards. (not mixed together)
- Turn all cards so they are facing down in one stack. (each player has own stack)
- Players take turns picking a card from their own stack.
- Players match up their own cards so that there is one analog, one digital, and one written in a match.
- If a player picks "Midnight!" All their cards go back into the pile.

Suggested Uses:

- Print out cards on card stock, cut, then laminate.
- Use as a math station to match analog, digital, and written times.
- Give each student a card and have them match up together into groups.
- Use as part of a focus wall to display times.
- Use as part of Board Math to match up times.
- Send home with students as practice.
