Decimal Word Problems Solve & Draw Task Cards

Directions

These Solve & Draw Task Cards are an easy way to give your students engaging practice with decimal word problems. Students will be challenged with multi-step problems, problems involving time, money, and weight. Solve & Draw Task Cards are also designed to provide practice of reading math directions and breaking down word problems. These are intended to be a challenge or review activity.

To Prep:

Print 1 copy of the task cards (in your choice of color or black-and-white) on cardstock and/or laminate for longer use. Print a student answer sheet for each student and the answer keys, if desired. You may have students work through the cards one set at a time, assign different sets to different students or groups depending on skill level, or use altogether as a more comprehensive review.

How Solve & Draw Task Cards Work:

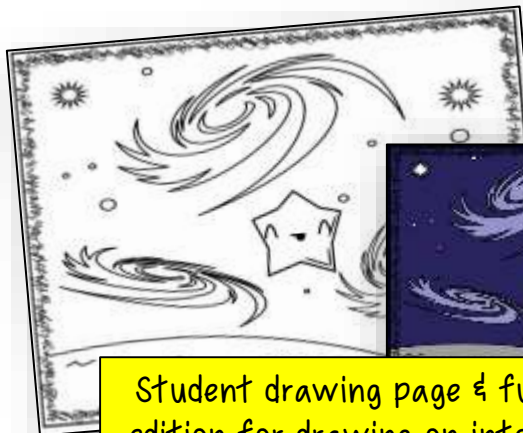

Students read the word problem, determine the steps they need to take, and solve the decimal calculations. Then, there are two related math problems, often requiring critical thinking and making connections, that will prompt them to add specific objects to the drawing.

Each set includes a drawing page and 8 task cards. You also receive a full color version of the drawing page – perfect for projecting onto an interactive whiteboard and having students take turns drawing on as you correct the work! Task cards are included in both color and black-and-white (ink-saver). An answer sheet with workspace is provided and may be copied on to the back of the drawing or printed separately.

Drawing prompts require a student to use multiple skills:

- Decimal calculations (all operations)
- Reading word problems carefully and determining the steps and calculations needed to solve
- Making math connections
- Independently using math vocabulary
- Reading directions accurately

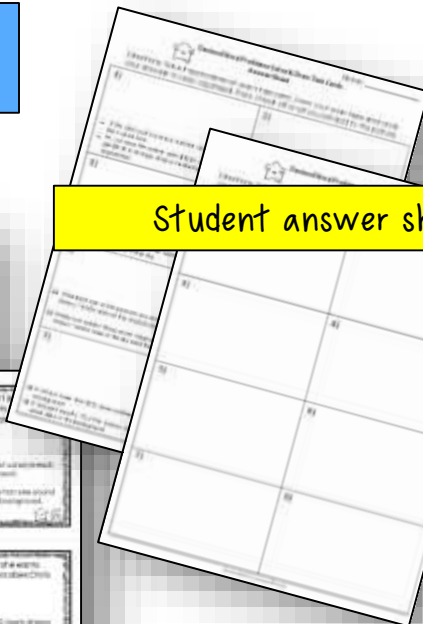

Set 1 Decimal Word Problem Solve & Draw Task Cards

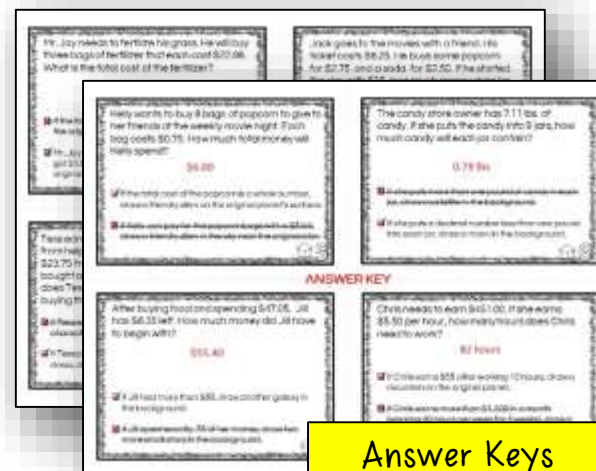

Student drawing page & full color edition for drawing on interactive whiteboard

Student answer sheets

Ink Saver (black-and-white)
Task Cards
