Thanksgiving

Solve & Draw

DIRECTIONS

Solve and Draw no-prep printables for are an easy, no-prep way to make subtraction fact practice more engaging around Thanksgiving! Inspired by a group of reluctant mathematicians with amazing creativity, these printables are designed to engage students in math practice with an artistic twist. This resource may be used as a fun quiz or review. Perfect for the sub tub or a math center. Subtraction within 20 is included

How Solve & Draw Activities Work

Students solve the subtraction fact problems and add to the Thanksgiving-themed drawing based on their answers. You may choose to allow colored pencils, crayons, or markers but they are not required. This works well as a homework option for families who may not have those supplies to offer and is a great "print and go" resource for sub days, warm ups, and math centers!

An optional challenge page is included that can be copied on the back of the worksheet – this gives students an extension opportunity by asking them to write a subtraction equation that fits one of the incorrect drawing prompts or to write a new equation and their own drawing prompts. This works well to extend thinking and for early finishers.
