DESIGN CHALLENGES

TREESCRAPERS!

Let's design a City with Treescrapers. Treescrapers are innovative skyscrapers that work like trees. The scrapers make oxygen, distill water, and produce energy just like trees. Nature has developed smart ways to survive. It uses photosynthesis as its source of energy, and it produces no pollution. All the waste can be recycled. Fill the mind map with ideas for a Smart Sustainable City inspired by trees.

DESIGN A FLOATING CITY

Why would you want to build a floating city?

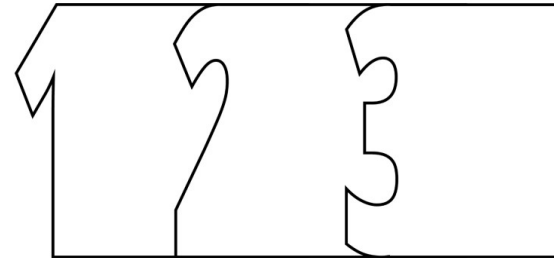

Imagine that you are going to build a city. Think about how you want to build it. What are you going to live in? What are you going to do there? What are they?

My design for a waterlily city!

THE SONORAN DESERT

Look for interesting facts about the Sonoran desert landscape where saguaro cacti grow.

Sonoran Desert in North America is a hot desert. The temperatures are warm throughout the year, with summer months often reaching extreme highs. Rainfall is infrequent and irregular. The desert is one of the most biodiverse deserts in the world and the home to a wide variety of animals and plants.

GREAT TO USE FOR

- ❖ Nature Projects
- ❖ Animal & Plants Projects
- ❖ Desert Units
- ❖ Centers
- ❖ Science Projects
- ❖ Biomimicry
- ❖ Thinking Challenges
- ❖ Independent Work
- ❖ Creativity Challenge
- ❖ Early Finishers

SAGUAROS

Look for interesting facts about saguaro cacti.
What birds use the cacti as their home?

The cactus's thick, waxy skin helps protect it from the harsh desert environment.

REVIEWS PLATYPUS LIFE CYCLE

This is a fun activity for learning about life cycles! It was a great addition to my Science lessons!

I bought this for my daughter to work at home. She had to do a research on interesting animals, and she wanted to do it on platypus. She enjoyed learning about platypus using the different activities included.
