The History of a Dynasty

Liam was feeling nervous while getting ready for school. Today was the day he had to give a presentation to his class about his chosen topic. Liam was interested in history and had researched a **dynasty** and learn about the powerful families that ruled the country.

Liam found it fascinating that all the members of the historic royal family wanted to be rulers. The **dynastic** approach to choosing rulers based on their family bloodline was interesting. Liam's presentation covered facts about the royal family, as well as how society viewed the royals at the time. Some people were loyalists, whereas others wanted the country to become a republic.

After weeks of research and writing up his presentation, Liam knew he had interesting information. He was mostly worried that he wouldn't be a **dynamic** speaker, and his classmates would become bored. Liam had included a visual presentation with comic-style images and illustrations to tell the story of the royal dynasty. He hoped it would make his speech more exciting.

Liam conquered his nerves and gave his presentation. The class listened attentively and enjoyed his information, along with the pictures.

"That was a **dynamite** presentation, Liam!" His friend Alex congratulated him after. Liam felt proud of his hard work and research.
