Cells to Organ Systems Maze

Read the question and find the answer. Continue the path to the finish box.

The fluid substance in a cell that helps it perform its purpose.

A group of cells that work together for a specific purpose.

The cells control the center, where the cell's chromosomes are housed.

Very thin sheets of tissue that line body cavities and separate structures.

A part of the body that has a specific function and is part of a larger system.

ATP

The basic building blocks of life.

Name: _____ Date: _____ Period: _____

The Skeletal System Maze

Read the question and find the answer. Continue the path to the finish box.

An immovable joint such as the ones found between the bones of the skull.

A thick layer of cartilage that covers the ends of bones.

The framework of the body.

The root of the spine.

Formed by 12 pairs of ribs, this is the upper part of the trunk between the neck and abdomen.

Inflammation of the bone caused by infection.

How many cranial bones make up their portion of the skull?

The root of the spine.

Spine

Cartilage

Eight

Lower division

What is the thigh bone called?

Finish!!

Name: _____ Date: _____ Period: _____

Muscular System Maze

Read the question and find the answer. Continue the path to the finish box.

Tearing, bleeding in separation of the muscle from tendon, or tendon from bone due to overuse and over stretching.

A nervous system disease that results in muscular weakness and atrophy.

A lack of muscle coordination.

Drug, such as aspirin, that reduces inflammation without steroids.

Small fibers found in skeletal muscles.

The main muscle that is involved in the given movement.

Microfibers

Prime Mover

Myofibrils

NSAID

Rhabdomyolysis

Spasm

Axonia

Clonus

Closing an angle at a joint, such as bending an elbow.

Tetany

Strain

Avulsion

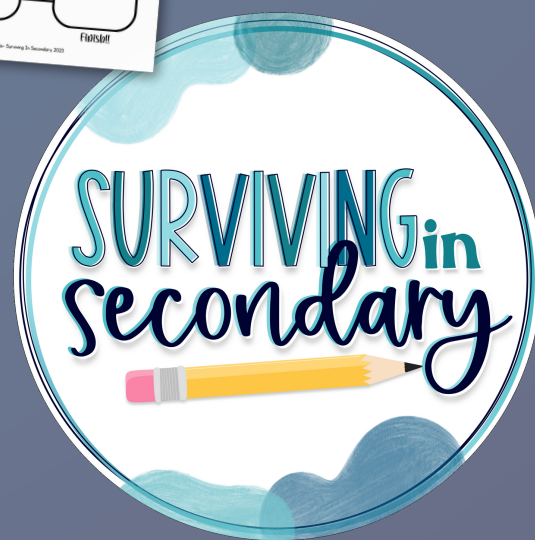

Positive strain injury

Kinesia

Tenostosis

Fibrosis

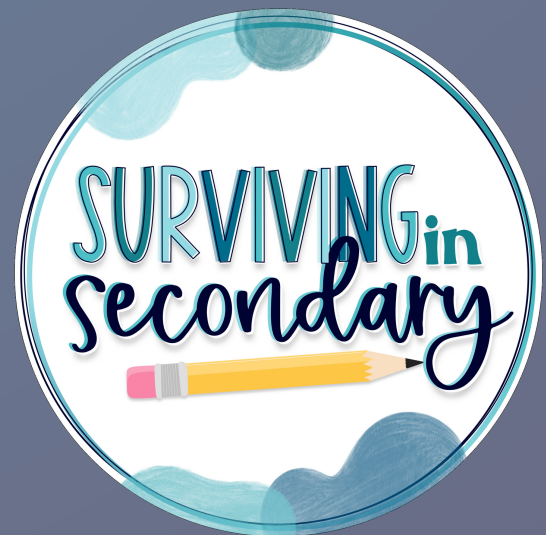

Inflammation of fibrous connective tissue that includes pain and stiffness.
