

WINTER ANIMALS BUNDLE

Super legs and feet

Look at the Ptarmigan's legs.
They are feathered.
Why?

Snow

Biomimicrists test ideas. Feathers on the legs help the ptarmigan to keep warm.

Why are the feet feathered?

The feathered feet may act like snowshoes so that ptarmigans can walk atop on soft snow.

How can you test this idea?

Can you build a model of a bird's? If you make one model without feathers and one that you put feathers on, then you can test the idea. How would you test it?

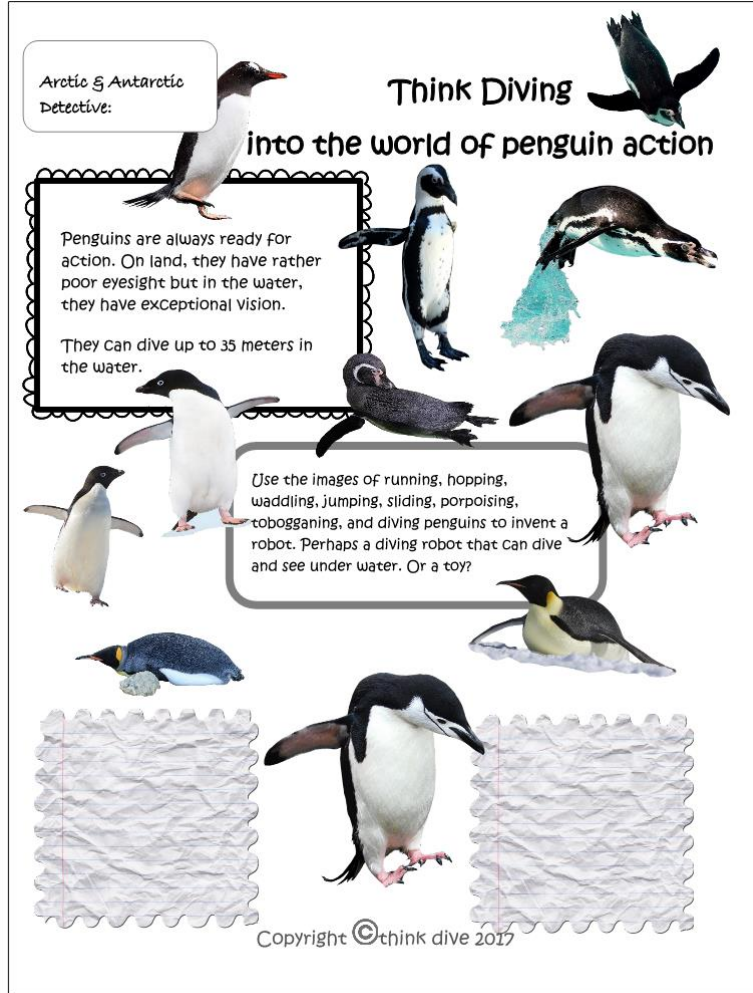

What do you think will happen?

Your students will LOVE creating things and their inventiveness will flow as they explore the genius of nature. Using nature as inspiration is a powerful way to inspire your students to focus their attention on interesting aspects of the animal world and to use these observations in creative ways.

INCLUDED

- ❖ Superpowers that Animals have
- ❖ Poetry and Story Writing
- ❖ Suggestions for art
- ❖ Thinking challenges
- ❖ Imagination Challenges
- ❖ Design Challenges
- ❖ Creativity methods – random inspiration
- ❖ Easel Activities
