What of the descriptions below is true?

Polar bears are a species of bear found primarily in the Arctic Circle, encompassing the Arctic Ocean, its surrounding seas, and surrounding landmasses. They are classified as marine mammals because they spend most of their lives on the sea ice of the Arctic Ocean. They have a thick layer of body fat and a water-repellent coat that provides insulation. Polar bears are excellent swimmers and primarily prey

2. Polar bears are a species of large amphibians closely related to frogs and salamanders. They have gills for underwater breathing and a slimy, scale-covered skin which helps them move swiftly in water. Their diet mainly consists of aquatic plants and small fish.

3. Polar bears are a type of large bird found in the Arctic. They are known for their impressive wingspan and ability to fly long distances. Their feathers are thick and white, providing insulation against the cold. They primarily feed on fish, which they catch during flight.

4. Polar bears belong to the feline family and share many characteristics with large cats like lions and tigers. They have retractable claws, a taste for meat, and a solitary hunting style. Their fur, marked with distinctive stripes, helps them camouflage in the snowy environment.

The number next to the correct description is the next number in the code

Plants can be classified into two sub-groups: flowering and non-flowering. Which group do each of these plants belong to?

apple trees	conifers	ferns	tulips	sunflowers	moss
-------------	----------	-------	--------	------------	------

The number on the keypad is the number of plants in

Clue 5

Cold-blooded living things that have scales and gills.

Cold-blooded invertebrates that have no backbone, no limbs and burrow in soil.

Cold-blooded invertebrates that have one foot, no shell and are slimy.

Winged vertebrates that lay eggs birds

Plants can be classified into two sub-groups: flowering and non-flowering. Which group do each of these plants belong to?

apple trees	conifers	ferns	tulips	sunflowers	moss	roses
-------------	----------	-------	--------	------------	------	-------

The eighth digit on the keypad is the number of plants in each group.

Escape the Room

Digit 1	Digit 2	Digit 3	Digit 4	Digit 5	Digit 6	Digit 7	Digit 8	Digit 9

Enter the numbers into the keypad boxes above.

Clue 9

Here are 6 facts about elephants. Which one is true?

- 1 Elephants are known for their love of climbing trees. In the wild, they are often found perched atop tall trees to survey their surroundings and search for food.
- 2 Elephants primarily use their tusks to dig for water sources underground. They can detect water several meters below the surface and use their tusks to create wells.
- 3 Elephants have a very strong social structure and are known to express emotions. They show signs of grief, joy, anger, and playfulness, and have been observed engaging in complex social behaviors like mourning their dead.
- 4 Elephants are nocturnal creatures and are most active during the night. They use their large ears to cool themselves in the daytime heat and prefer to rest in shaded areas until nightfall.
- 5 Elephants can fly short distances using their large ears as wings. They do this primarily to cross rivers or escape predators.
- 6 Elephants are the largest land animals currently on Earth. They are well-known for their large size, with African elephants being the largest species.

The correct answer is the sixth clue.
The final digit on the keypad is 6.
