

RENEWABLE & NONRENEWABLE RESOURCES PRESENTATION

Google Slides Presentation

Scaffolded Graphic Organizers

Links to Freebies!

A graphic organizer titled "Renewable and Nonrenewable Resources" is shown. The title is at the top center. Below it, a subtitle reads "the graphic organizer by writing down 2 key details about the energy source as you learn about renewable and nonrenewable resources". To the right of the title, there are fields for "Date" and "Pd:". The organizer is divided into two main columns: "Non-Renewable Resources" on the left and "Renewable Resources" on the right. Under "Non-Renewable Resources", there are three boxes labeled "Coal", "Natural Gas", and "Oil (Petroleum)". Under "Renewable Resources", there are four boxes labeled "Solar", "Wind", "Hydropower", and "Geothermal". Each box has two bullet points for notes. A circular logo in the bottom right corner says "SURVIVING in Secondary" with a pencil icon. Three grey arrow-shaped callouts are overlaid on the left side of the image: "Slides", "Graphic", and "Freebies!".
