

Cancer: Uncontrolled Cell Division

- Cancer Stats
- Cancer Hallmarks
- Benign vs. Malignant Tumors
- Metastasis
- Cancer Causes
- Types of Cancer
- Cancer Prevention
- Diagnosing Cancer
- Treatments

“★★★★★ Extremely satisfied - It's easy to use, and it also helps me stay focused and stay on track in class since I don't have to make these from scratch.”

HOW THIS LESSON HELPS YOU

- **Saves Prep Time** - Everything is pre-made, ready to go, and fully editable.
- **Provides Built-In Assessments** - The auto-graded exit ticket lets you quickly check for understanding.
- **Provides Applicability** - the lesson includes multiple examples of real-life applications.

Cancer: Uncontrolled Cell Division

- Cancer Stats
- Cancer Hallmarks
- Benign vs. Malignant Tumors
- Metastasis
- Cancer Causes
- Types of Cancer
- Cancer Prevention
- Diagnosing Cancer
- Treatments

Lesson with Embedded
Videos

★ Auto-Graded Exit Ticket

What You Get

The image displays two side-by-side versions of a presentation slide titled "The Six Hallmarks of Cancer". The slide lists six hallmarks: 1. Cell growth and division absent the proper signals; 2. _____; 3. Avoidance of programmed cell death; 4. Limitless number of cell divisions; 5. _____; 6. Invasion of additional tissue in the body. The slide includes two images: a liver with red spots labeled "Liver Cancer" and a diagram of a human torso with colored arrows indicating internal processes. The Teacher version (right) has the second hallmark as "Continuous growth and division even given contrary signals" and the fifth as "Promoting blood vessel construction". The Student version (left) has blank lines for these two hallmarks. Red arrows point from the text "Student and Teacher versions of the presentations" at the bottom to the respective slides.

The Six Hallmarks of Cancer

1. Cell growth and division absent the proper signals
2. _____
3. Avoidance of programmed cell death
4. Limitless number of cell divisions
5. _____
6. Invasion of additional tissue in the body

The Six Hallmarks of Cancer

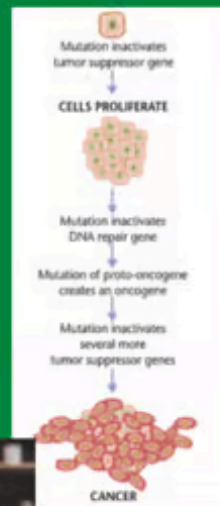

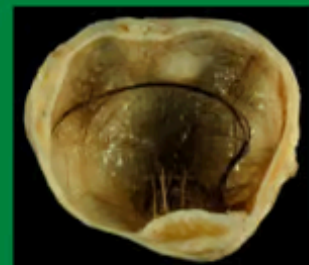

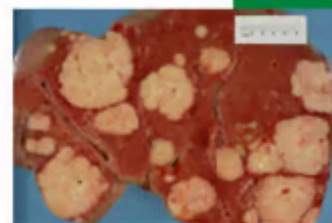

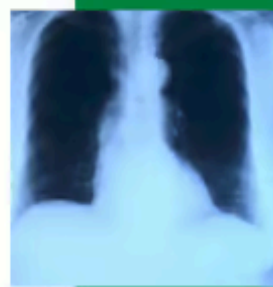

1. Cell growth and division absent the proper signals
2. Continuous growth and division even given contrary signals
3. Avoidance of programmed cell death
4. Limitless number of cell divisions
5. Promoting blood vessel construction
6. Invasion of additional tissue in the body

- ✓ Treatments

HAPPY TEACHERS SAID...

★★★★★ Extremely satisfied - It's easy to use, and it also helps me stay focused and stay on track in class since I don't have to make these from scratch.

★★★★★ Extremely satisfied - Kids loved this! Very informative and engaging. Will definitely use it for years to come.

★★★★★ Extremely satisfied - I was able to easily take and utilize this resource for my classroom needs.

★★★★★ Extremely satisfied - While this is a hard unit to go over with the students it was very easy to understand.

Upgrade to the Cancer 5E Bundle

Get the lesson, teaching timeline, plus additional activities, and assessments inside the 5E Bundle.

★★★★★ Extremely satisfied - I am really happy with this resource! It sparked lots of awesome discussions with my students.

★★★★★ Extremely satisfied - Well thought out, students enjoy these activities.
