

1

Ella bought a wreath and some garland to decorate her house. The garland cost \$100. The garland was \$45 more than the wreath. How much did she pay for the garland and the wreath?

2

Santa is delivering gifts to children in 4 hospitals. He has one large bag with 14 gifts and a smaller bag with 18 gifts. If he brings the same number of gifts to each hospital, how many will each hospital receive?

3

Serenity made a snowman. The head weighed 5 lbs, the middle section weighed 10 lbs, and the bottom was twice as heavy as the middle section. How many lbs. did her snowman weigh in all?

4

The Vasquez family is going ice skating. The price for adults is \$5.00 and the price for children is \$3.50. How much change will they receive after paying with a \$20 bill if 2 adults and 2 children skate?

5

Miguel is decorating his cabin with lights. He strung 12 chords that each had 12 lights. When he plugged them in he found 8 lights that were burnt out. How many lights on his cabin are working?

6

A snow globe factory made 185 snow globes on Monday, 148 on Tuesday, and 203 on Wednesday. How many snow globes were made on these 3 days?

7

Kara is going to hand out candy canes to her neighbors. She has 5 boxes of blueberry candy canes. Each box has 12 candy canes. If she has 5 neighbors, how many candy canes will each neighbor get?

8

The bell choir is playing three 5 minute songs and six 4 minute songs for their concert. How many total minutes will they be performing?

9

Ashley has \$50 to spend on decorations. She purchased a tree for \$30. She wants to spend the rest on ornaments. How many \$2 ornaments can she buy?

10

Cooper made 100 ornaments to deliver to a retirement home. He placed 37 of them on the Christmas tree in the lobby and wants to give the rest out to the residents. If each of the 9 residents get the same amount, how many will each receive?

11

Emmi is wrapping presents for children in need. She has 20 blue and 18 green basketballs to wrap. It takes her 9 minutes to wrap each one. How many minutes will it take to wrap all of the basketballs?

12

Jonathan mowed 7 of his neighbors lawns. He charged \$25 to mow each lawn. He plans to buy his little sister a new pair of ice skates for \$119. How much will he have left?

13

Ariana left the cabin and hiked 6 miles in the snow. It took her 24 minutes to hike each mile. She also stopped to eat lunch for 20 minutes. How many minutes was she out on her hiking trip?

14

The Gonzalez family decorated 3 pine and 2 elm trees in their front yard. They hung 9 chords with lights on each tree. How many chords of lights did they hang in all?

15

Mrs. Kim made 100 bags of peppermint popcorn. She sold 38 bags for \$5 each. The supplies to make the popcorn were \$44. How much profit did she make from selling her peppermint popcorn?

16

There are 5 Christmas trees in the town square. Four of the trees have 15 ornaments on them. The 5th tree is the largest and has 65 ornaments. How many ornaments are on all 5 trees?

17

Isabella's family made 3 dozen sugar cookies. They put 9 chocolate chips on each cookie. How many chocolate chips did they use in all?

1 dozen = 12 cookies

18

Rick is going to make garland out of popcorn to hang on his tree. He wants the garland to be 24 feet long and each foot needs 8 pieces of popcorn. If each bag contains about 100 pieces of popcorn, how many bags will he need to make his garland?

19

Joshua made 6 snow globes for his friends. Each snow globe is filled with 28 oz. of special solution. He also made one large snow globe for his mom filled with 50 oz. of special solution. How much special solution did he use in all?

20

Santa feeds each of his 8 reindeer 15 oz. of marshmallows as a special treat on Christmas Eve. Marshmallows are sold in 10 oz. bags. How many bags of marshmallows will he need on Christmas Eve?

MULTI-STEP PROBLEM SOLVING

All Four Operations

3rd Grade
20 Task Cards

KEY #1-10

1. $100 + (100 - 45) = \$155$

6. $185 + 148 + 203 = 536$
snow globes

2. $(14 + 18) \div 4 = 8$ gifts

7. $5 \times 12 \div 6 = 10$

3. $5 \times 10 + (2 \times 10) = 35$ lbs.

8. $(3 \times 5) + (6 \times 4) = 39$
minutes

4. $20 - (5 + 5 + 3.50 + 3.50) = \$2.50$

9. $(50 - 30) \div 2 = 10$
ornaments

5. $(12 \times 12) - 8 = 136$ lights

10. $(100 - 37) \div 9 = 7$
ornaments

©2016, Marvel Math

KEY #11-20

11. $(20 + 18) \times 9 = 342$
minutes

16. $(4 \times 15) + 65 = 125$
ornaments

12. $(25 \times 7) - 119 = \$56$

17. $3 \times 12 \times 9 = 324$ chocolate
chips

13. $(24 \times 6) + 20 = 164$ minutes

18. $(24 \times 8) = 196$
He will need 8 bags

14. $(3 + 2) \times 9 = 45$ chords
of lights

19. $(6 \times 28) + 60 = 228$ oz.

15. $(38 \times 5) - 44 = \$146$

20. $(8 \times 15) \div 10 = 12$ bags
