How To Play "Dawn!"
2 Players, each player needs their own stack of cards. (not mixed together)
Choose one color of cards (i.e. only analog clock, only written, or only digital)
Turn all cards so they are facing down in one stack. (each player has own stack)
Players turn over one card at a time at the same time to reveal their cards.
The player with the earlier time says, "Dawn!" and wins both cards. (12 o'clock is considered the earliest card.)
If a player picks "Midnight!", he/she must give the other player two cards.
If players show the same card at the same time, then both players put all their cards back in their own pile to be drawn
the person who has all the cards.

How To Play "Dusk!"
2 Players, each player needs their own stack of cards. (not mixed together)
Choose one color of cards (i.e. only analog clock, only written, or only digital)
Turn all cards so they are facing down in one stack. (each player has own stack)
Players turn over one card at a time at the same time to reveal their cards.
The player with the later time says, "Dusk!" and wins both cards. (12 o'clock is considered the latest card.)
How To Play "Midnight!"
2-4 Players, each player needs their own stack of cards. (not mixed together)
Turn all cards so they are facing down in one stack. (each player has own stack)
Players take turns picking a card from their own stack.
Players match up their own cards so that there is one analog, one digital, and one written in a match.
If a player picks "Midnight!" all their cards go back into the
tches up his/her
y one "Midnight!"

Suggested Uses:
Print out cards on card stock, cut, then laminate.
Use as a math station to match analog, digital, and written times.
Give each student a card and have them match up together into groups.
Use as part of a focus wall to display times.
Use as part of Board Math to match up times.
Send home with students as practice.
