Included Skills

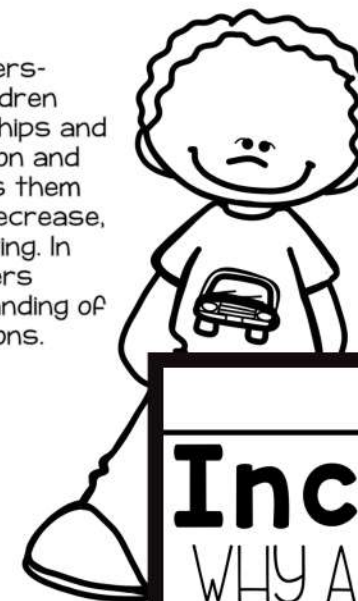

WHY ARE WE LEARNING THIS?

• Sight Word Practice- Sight words are common words that children should recognize instantly to improve reading fluency. Knowing these words without sounding them out helps build confidence and reading comprehension. In first grade, strong sight word knowledge allows children to focus on understanding stories rather than struggling with word recognition.

• More/Less - Comparing Numbers- Comparing numbers helps children understand number relationships and builds a foundation for addition and subtraction. This skill teaches them how numbers increase and decrease, which is key for problem-solving. In first grade, comparing numbers leads to a stronger understanding of place value and math operations.

• Make learning fun!
Don't stress too much at this age.
Just enjoy the process.

Included Skills

WHY ARE WE LEARNING THIS?

• Place Value to 20-Understanding place value helps children see that numbers are made up of tens and ones, which is essential for all future math learning. When children grasp that 12 is "one ten and two ones," they can more easily add, subtract, and compare numbers. A strong foundation in place value in kindergarten sets the stage for adding and subtracting larger numbers in first grade.

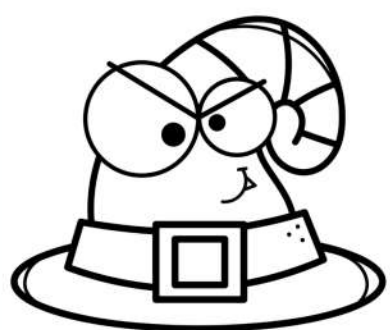

• Addition and Subtraction to 5 with Pictures- Using pictures to solve addition and subtraction problems helps children visualize math concepts and develop number sense. Seeing objects grouped together or taken away

prepares them for more complex equations in first grade.

October Week 3

Letter ID: R-T
Handwriting R-T
Sight Words: are, as
Math: Place Value 1-20
Which has more?
ABB Patterns
Halloween Opinion Writing
Scissor Practice

Included Skills

WHY ARE WE LEARNING THIS?

• Letter Recognition- Recognizing letters is the foundation of reading and writing. When children can quickly identify letters by name, they are better prepared to connect letters to sounds, which is essential for decoding words. Strong letter recognition in kindergarten leads to smoother reading development in first grade.

• Patterns- Recognizing and creating patterns builds early math skills and logical thinking. Patterns help children predict what comes next, which strengthens their ability to recognize sequences in numbers and letters. In first grade, this skill supports problem-solving in math and reading comprehension.

• Beginning Sound Practice- Understanding the sounds that letters make is a critical step in learning to read. Beginning sound practice helps children develop phonemic awareness, which allows them to blend sounds into words. This skill makes it easier for them to read and spell in first grade.
