# Editable Music Desk Name Tags

+ Make your own song activity

# How to use this product

These music desk name tags will make a colorful edition to your classroom, and also help provide a quick reference for your students. Included is a PowerPoint and a PDF file, with a number of different options to cater to students who may need extra guidance in their musical journeys. There are black and white options available for each, and they are designed to be printed out on standard A4 paper. I've also included instructions for the activity on page/slide 9.

In order to use the PowerPoint file, you will need to have **Microsoft PowerPoint**. Each tag already has a text box layered over the top. All you need to do is add the name or word you would like to use and print them out. The tags themselves cannot be edited, but feel free to change the font size and type to suit your needs. The PDF file itself is not editable.

This product is for personal classroom use only, and is not to be resold or added to commercial or free products.

# Make your own name song activity

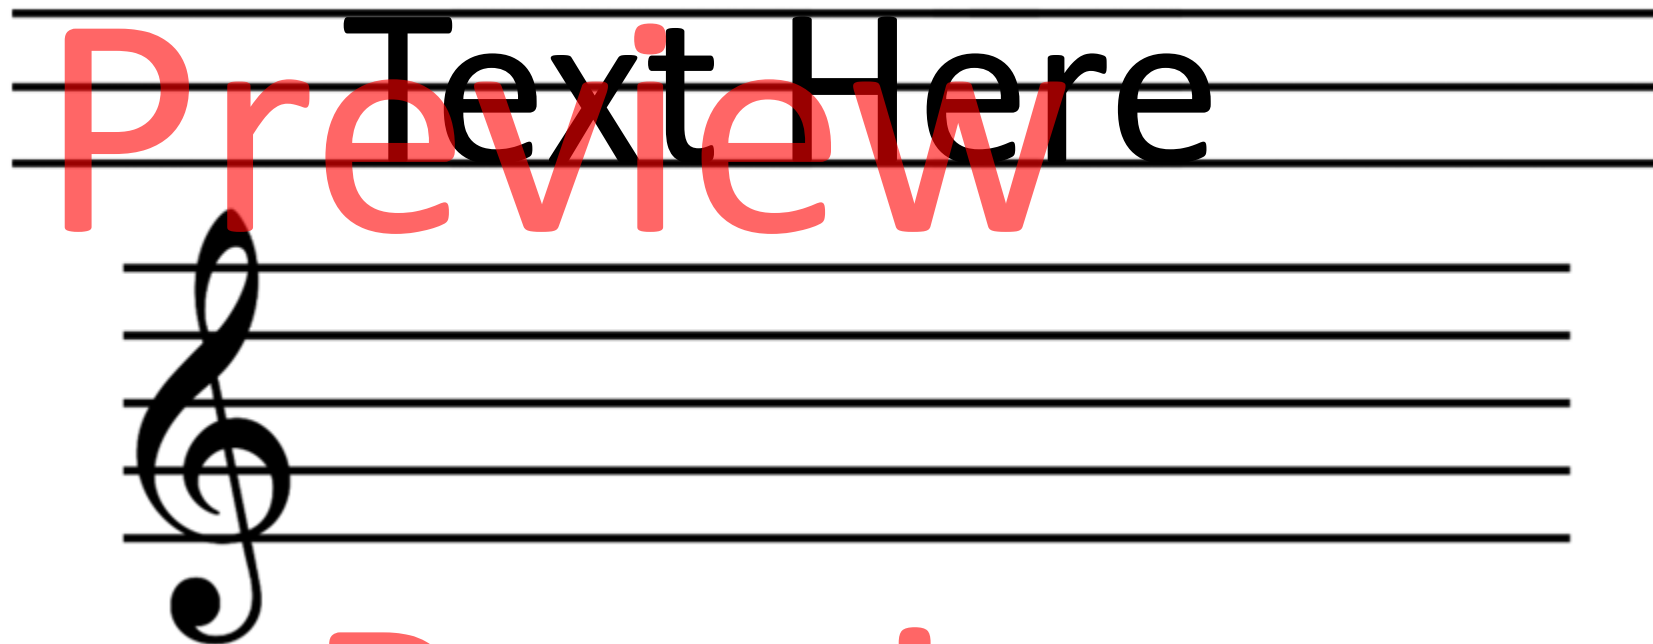

On the next four pages, you'll find two versions of the name tag—one in color and one in black & white. Each tag includes a blank **treble or bass clef staff**.

- **Start by writing your name** in the space provided.
- Then, underneath each letter, **choose and write a music note** on the staff (you can pick any note you like!).
- The notes you choose will become your very own **"Name Song"!**

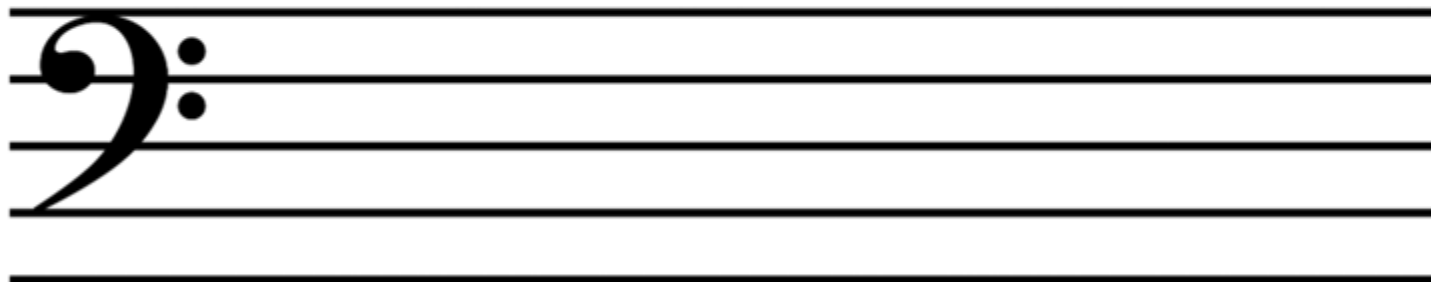

Optional Tip:

To keep things fair and musical, you can set a rule that all students must use the **same number of notes** (e.g., limit it to 6 or 7), especially if some names are much longer or shorter.
