

Thank you for your interest in my Word Search and Scramble for **Inventors and their Inventions**.

I think the best way to showcase this product is for you to see a complete, working version so what I've included is the next best thing, my Ecology version. This way, you can see exactly how yours will look.

Your version will be the same but will use words associated with **Inventors and their Inventions**. I've included the word list below.

THOMAS EDISON

ALEXANDER GRAHAM BELL

NIKOLA TESLA

MARIE CURIE

LEONARDO DA VINCI

GEORGE WASHINGTON

CARVER

WRIGHT BROTHERS

BENJAMIN FRANKLIN

JAMES WATT

ALBERT EINSTEIN

ARCHIMEDES

ADA LOVELACE

ISAAC NEWTON

GALILEO GALILEI

SAMUEL MORSE

GRACE HOPPER

HEDY LAMARR

ALESSANDRO VOLTA

MICHAEL FARADAY

STEPHANIE KWOLEK

ROSALIND FRANKLIN

ALEXANDER FLEMING

RUDOLF DIESEL

KARL BENZ

HUMPHRY DAVY

Ecology Word Search - Scrambled – KEY

Word Scramble – Unscramble each word then write the definition - KEY.

Scrambled Term	Term	Definition – Define each of the terms
YEDRBSIIVOT	BIODIVERSITY	The variety of life forms within a particular habitat or ecosystem.
EIBMO	BIOME	A large ecological area on the earth's surface with distinct animal and plant groups adapted to its environment.
HPEBROESI	BIOSPHERE	The global sum of all ecosystems, including all life forms and their relationships.
RANVRICEO	CARNIVORE	An animal that feeds primarily on other animals.
NMUNOITYC	COMMUNITY	A group of different species living together and interacting in a specific area.
CPOEDOESRM	DECOMPOSER	Organisms, such as bacteria and fungi, that break down dead organic material into simpler substances.
ECILCOOGNAH LIEN	ECOLOGICAL NICHE	The role and position a species has in its environment, including what it eats, how it behaves, and how it interacts with other species.
SYOMEETCS	ECOSYSTEM	A community of living organisms and their physical environment interacting as a system.
CHNIF DAOO	FOOD CHAIN	A linear sequence of organisms through which nutrients and energy pass as one organism eats another.
DWBOO EF	FOOD WEB	A network of interconnected food chains in an ecosystem, showing how different organisms are related through what they eat.
ITBAAHT	HABITAT	The natural environment in which a species lives and grows.
EORIBHVER	HERBIVORE	An animal that primarily eats plants.
SIIEAPCSE NEIVS	INVASIVE SPECIES	Non-native species that spread widely and cause harm to the environment, economy, or human health.
KESYESTONC SEIPISE	KEYSTONE SPECIES	A species that has a disproportionately large effect on its environment relative to its abundance.
ALSITUMM	MUTUALISM	A symbiotic relationship between two species in which both benefit.
OMRINEOV	OMNIVORE	An animal that eats both plants and animals.
MIRPISTASA	PARASITISM	A relationship between two species where one organism (the parasite) lives on or in another organism (the host), causing it harm.
SSYHTPIESOHNO	PHOTOSYNTHESIS	The process by which green plants and some other organisms use sunlight to synthesize nutrients from carbon dioxide and water.
LIUOANPPT	POPULATION	A group of individuals of the same species living and interacting in the same area.
DEORPART	PREDATOR	An animal that naturally preys on others.
YREP	PREY	Animals that are hunted and eaten by predators.
RCEUDORP	PRODUCER	Organisms, such as plants and algae, that produce their own food through photosynthesis and serve as a food source for other organisms in an ecosystem.
SUCOCENISS	SUCCESSION	The gradual process by which ecosystems change and develop over time, involving species in one stage being gradually replaced by different species.
YSSMIBIOS	SYMBIOSIS	A close and long-term biological interaction between two different biological organisms, which may be mutualistic, commensal, or parasitic.
EHVLCIP TROEL	TROPHIC LEVEL	The position an organism occupies in a food web, categorized by the number of energy-transfer steps to reach that level.
