Fun monthly themes keep kids engaged!

Don't lose momentum over the summer.
A summer review packet is included!

3 YEAR OLD SUMMER REVIEW PACKET

Finally! A preschool curriculum that does **ALL** of the work for you...just print & start!

Take away the guess work- this has been used by hundreds of preschool teachers and homeschool families.

Get your time back! It's all laid out for you. No laminating, cutting or searching for materials!

Don't stress that you will miss a concept. **I spent years in the classroom** and know exactly what kids need to know when starting school.

Repetition is key! This curriculum **uses repetition to build confidence.**

Written and designed by a **National Board Certified Educator** with **10 years of experience in early childhood**. I'm a mom to two littles (age 3 & 7) and I am passionate about helping you!

These workbooks are not random! The **difficulty builds to target mastery**. You will only see skills or concepts that have been taught in the review pages. No confusion or frustration.

ARE OTHER "PRESCHOOL RESOURCES" TOO DIFFICULT FOR YOUR 3 YEAR OLD?

Age 3 Curriculum

This curriculum makes it simple.

- Only 1-3 activities per page.
- All print is LARGE and simple. No complicated graphics.
- Only exposes 3 letters per month. No small tracing yet.

Preschool Curriculum
(found in my shop)

What's taught?

- Letter ID & Sound ID
- Numeracy & Counting to 10
- AB, ABB, AAB, ABC Patterns
- Shapes
- Colors
- Which is different?
- More & Less
- Bigger & Smaller
- Handwriting
- Fine Motor Skills
- Vocabulary
- Cutting Practice

What's included?

- A curriculum plan
- Companion Text Suggestions
- Weekly guides
- 10 workbooks with at least 80 low-prep pages each
- This a digital download so you can print at home & start right away!

Included Skills

WHY ARE WE LEARNING THIS?

- Line Tracing: Tracing lines helps toddlers develop fine motor skills and hand-eye coordination. It lays the foundation for writing by teaching them how to control a pencil or crayon.
- Line Connecting: Connecting lines or dots improves visual-motor integration, an essential skill for writing and drawing. It also encourages cognitive skills like problem-solving.

Reinforce Learning

Ideas for everyday

While these worksheets are a wonderful way to build early skills, young children learn best when they can explore, move, and play. Everyday moments are full of opportunities to practice letters, numbers, colors, shapes, and patterns in ways that feel fun and natural. Here are some simple, hands-on activities you can reinforce the weekly skills through play:

3 Year Old Curriculum

HOW DO I USE THIS CURRICULUM?

- The curriculum builds in skill development/rigor and reviews previously learned skills to reinforce learning. If you would like to purchase the bundle it can be found in my shop!
- Utilize the curriculum map to see the monthly skills. The plan is also broken up by weeks within the workbook to help you set a focus for each week.
- The idea is to do a few pages per day M-TH and then use Friday to finish and review to start the next week fresh! I purposely make weeks 1 & 2 a bit heavier each month so that you can make sure you are caught up and ready to start each month fresh & you can add activities that your child/children may need additional practice with. As always, do what works for your child/ren. The full curriculum includes literacy & math items separate and blank curriculum plans and weekly goals for your convenience.
- Not all children will be ready for all skills included in this packet. Please pick and choose the appropriate skills for your students/child. If you purchased the full curriculum, there is a lot of repetition, so you can ensure they grasp concepts later in the year. (If this is too easy, consider purchasing the Preschool Curriculum)
- Please be cautious with scissor work. Some activities may need to be cut by an adult before working.
- Make learning fun! Don't stress too much at this age. Just enjoy the process.
- Please reach out to me if you see a mistake or have any questions or concerns! I am here to help! As with any small business, I cannot thank you enough for supporting me and would appreciate a review to help me continue supporting educators & families.

HOW DO I USE THIS CURRICULUM?

- This workbook is part of a larger curriculum bundle. The curriculum builds in skill development/rigor and reviews previously learned skills to reinforce learning. If you would like to purchase the bundle it can be found in my shop!
- Utilize the curriculum map to see the monthly skills. The plan is also broken up by weeks within the workbook to help you set a focus for each week.
- The idea is to do a few pages per day M-TH and then use Friday to finish and review to start the next week Fresh! I purposely make weeks 1 & 2 a bit heavier each month so that you can make sure you are caught up and ready to start each month Fresh & you can add activities that your child/children may need additional practice with. As always, do what works for your children. The full curriculum includes literacy & math items separate and blank curriculum plans and weekly goals for your convenience.
- Introducing the alphabet and numbers does go quickly in this curriculum because most children have been exposed to these. If your child has not mastered these skills and is struggling to keep up, you may want to slow down or try starting with my Preschool Curriculum.

Included Skills

WHY ARE WE LEARNING THIS?

- Reading Comprehension- Reading comprehension passages help children develop critical thinking and the ability to understand and recall details from a text. By practicing skills like identifying key ideas, making predictions, and answering questions, children build a strong foundation for deeper learning. In first grade, strong comprehension skills allow them to read longer texts with confidence and begin analyzing stories for meaning.
- Digraphs, where two letters work together to make one sound (like sh, ch, th, and wh), are essential for phonics development. Learning digraphs helps children read and spell more complex words by recognizing common sound patterns. This skill is crucial in first grade, where they will build on their phonics knowledge to read fluently and write with greater confidence.

up all of the sight word flash cards and continue to master. About halfway through, the curriculum will include sentences and include sight words from the curriculum. These will continue monthly and get more difficult as introduced.

If you see a mistake or have any questions or need help with any small business, I cannot thank you enough and would appreciate a review to help me continue to grow & flourish.

Weekly Focus Pages

Decodable Story
Read the story 3 times to build fluency with digraphs.
A fish is in the pond.
What is that? It is big and shiny.
He had a rod and a hook with him.
They went to the shore to fish.
He said, "This is so much fun!"
We can catch many fish by the shed.
Now they are happy with their fish.

Included Skills

WHY ARE WE LEARNING THIS?

- Sight Word Practice- Sight words are common words that children should recognize instantly to improve reading fluency. Knowing these words without sounding them out helps build confidence and reading comprehension. In first grade, strong sight word knowledge allows children to focus on understanding stories rather than struggling with word recognition.
- More/Less - Comparing Numbers- Comparing numbers helps children understand number relationships and builds a foundation for addition and subtraction. This skill teaches them how numbers increase and decrease, which is key for problem-solving. In first grade, comparing numbers leads to a stronger understanding of place value and math operations.
- Make learning Fun! Don't stress too much at this age. Just enjoy the process.

©All Rights Reserved 2024: ABEadventures

Included Skills

WHY ARE WE LEARNING THIS?

- Letter Recognition- Recognizing letters is the foundation of reading and writing. When children can quickly identify letters by name, they are better prepared to connect letters to sounds, which is essential for decoding words. Strong letter recognition in kindergarten leads to smoother reading development in first grade.
- Patterns- Recognizing and creating patterns builds early math skills and logical thinking. Patterns help children predict what comes next, which strengthens their ability to recognize sequences in numbers and letters. In first grade, this skill supports problem-solving in math and reading comprehension.

Practice- the sounds that a critical step in d. Beginning sound children develop eness, which allows sounds into words. This easier for them to read t grade.

Which is biggest?
Make your own pattern
All About Fall Writing

©All Rights Reserved 2024: ABEadventures

Included Skills

WHY ARE WE LEARNING THIS?

- Number Recognition- Knowing numbers by name and understanding their order builds a strong foundation for math. When children can quickly identify numbers, they are ready to move on to more complex concepts like counting, addition, and subtraction. First graders who recognize numbers easily have an advantage in learning place value and equations.
- Subitizing- Subitizing, or instantly recognizing a small number of objects without counting, strengthens number sense. This skill helps children quickly grasp addition and subtraction concepts by understanding quantities at a glance. First graders who can subitize are better prepared for mental math strategies.
- Bigger and Smaller Activities- Comparing sizes helps children develop spatial awareness and measurement skills. Understanding which object is bigger or smaller prepares them for more advanced math concepts like ordering numbers and understanding place value. In first grade, these skills are essential for comparing numbers and learning measurement.
