Math

What a super
star!!

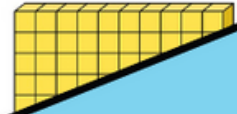

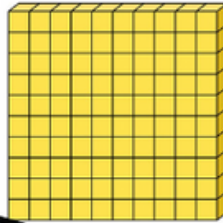

-  **Critical Thinking Adventure: Engage young minds in a captivating exploration of numbers. The activity prompts students to analyze and compare different number models, fostering critical thinking skills in a playful setting.**
-  **Progressive Learning: The Google Slides PowerPoint operates seamlessly in presentation mode, guiding students through a series of 20 carefully curated questions.**

COMPARING 2 NUMBERS

Compare these two values by choosing a symbol.

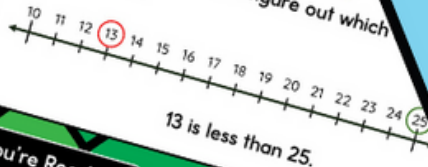

When we compare numbers we can pick one of these steps. Let's use 13 and 25 for an example.

1. Use place value blocks to figure out which number is greater.

1. Use a number line to figure out which is greater.

You're Ready!

Immediate Feedback: Embrace a culture of learning through feedback. If a student answers correctly, they seamlessly progress to the next question. If an answer is incorrect, a gentle reminder appears, redirecting them to give it another go.

 **User-Friendly Navigation:** The intuitive design allows for easy navigation, ensuring that students can focus on the joy of learning without technical barriers.

-  **Easy Implementation: As a Powerpoint Show resource, it requires minimal setup. Launch the presentation mode, and let the learning adventure unfold.**
