

Lambs

Popcorning

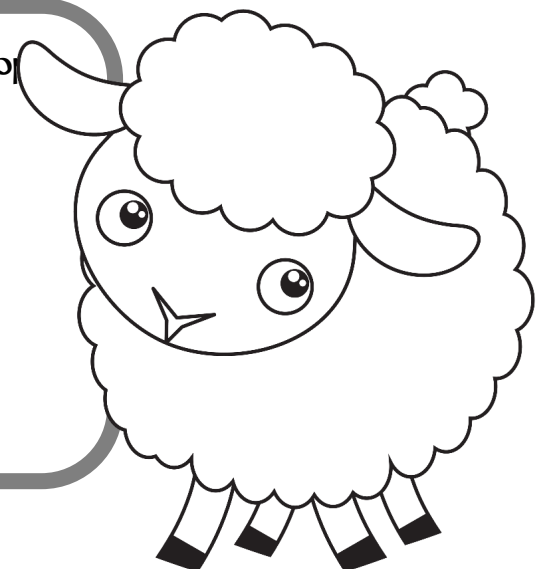

Invent a jumping robot in-
spired by popcorning lambs.

What things would the robot be able to do? Make a
clay model of your robot.

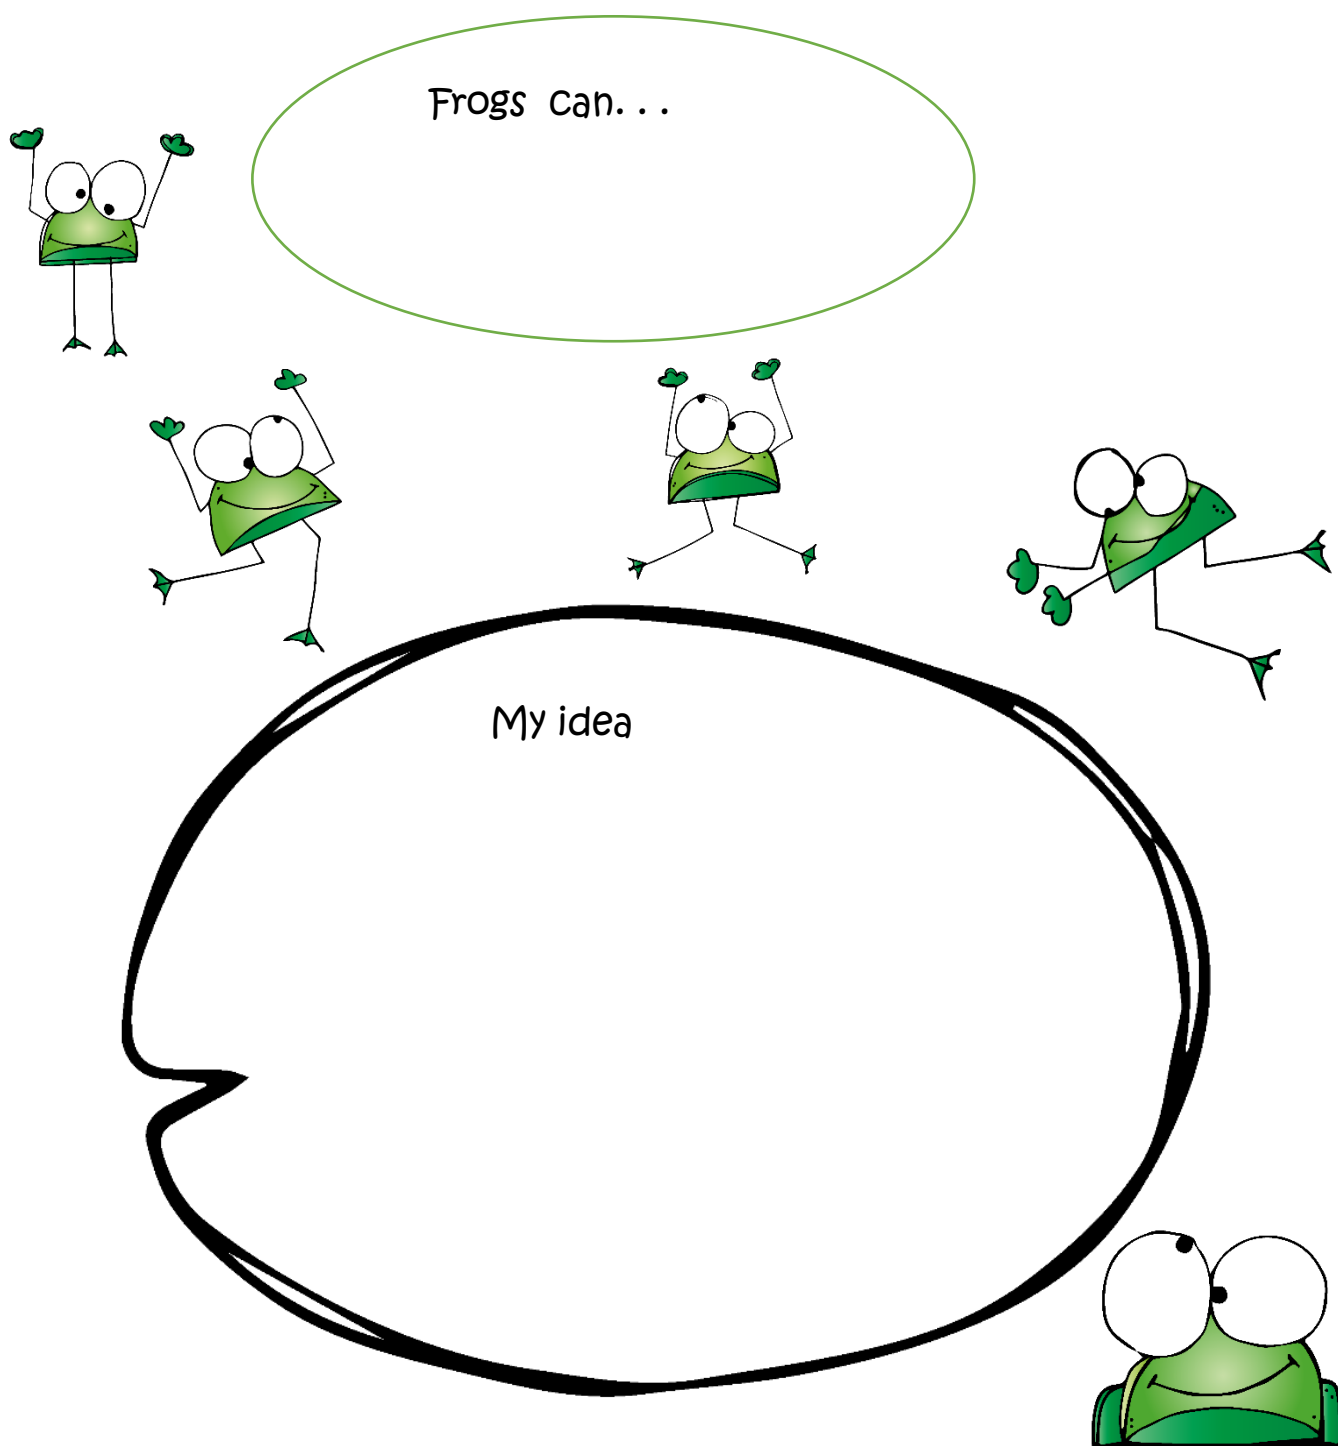

My idea

Give your invention
COOL NAME.

Wallace flying frogs spend most of the day in the trees. They leap and “fly” from tree to tree. They spread out their webbed feet when they “fly”.

Invent something inspired by the way frogs move around.

BiOMiMiCry Lapbook

Make a cover

You can use colored or white paper to make the cover. Students can paint and decorate the cover. Note the lapbook shows images from my Spring Bundle, which includes flowers.

Back of the folder

Students can insert a story, or a page about an animal.

INSIDE the FOLDER

Enjoy!
