

HANDS ON DIVISION

HANDS-ON DIVISION SPINNERS

Dividing by
1-6

HANDS-ON DIVISION: FAIR SHARES

TASK 2

YOU WILL NEED:

- Counters, mini erasers or other small objects (60)
- One Die
- Paperclip to use with spinner
- Hands-On Division Spinners page (divide by 1-6)
- Dry erase board & dry erase marker

DIRECTIONS:

1. Roll the die (1 to 6). Draw that number of circles on the dry erase board. Each circle will represent one group.
2. Spin the spinner for the number you rolled on the die in step 1. Count out that many objects.
3. Evenly divide the objects between the groups you drew on the dry erase board. Find the answer to your division problem.

EXAMPLE:

1. You rolled a 6.

4. How many objects did you put in each group?

5

This is the answer to your division problem.

$$30 \div 6 = 5$$

2. Count out the number of objects on the spinner.

3. Divide the objects evenly between the circles.

HANDS-ON DIVISION: ARRAYS

TASK 4

YOU WILL NEED:

- Counters, mini erasers or other small objects (60)
- One Die
- Paperclip to use with spinner
- Hands-On Division Spinners page (divide by 1-6)

DIRECTIONS:

- Roll the die (1 to 6).
- Spin the spinner for the number you rolled on the die. Count out the number of objects from the spinner.
- Look at the number on the die you rolled in step 1. Arrange the objects you counted out into that number of rows.
- The number of objects in each row is the answer to your division problem.

EXAMPLE:

- You rolled a 5.

Use this spinner for the 5's

- How many objects are in each row?
7

This is the answer to your division problem.

$$35 \div 5 = 7$$

- Count out the number of objects on the spinner.

- Arrange the objects into this number of rows.

$$32 \div 4 = 8$$

Activities Include

- Skip Counting
- Fair Shares Division
- Take Out Equal Sets Division
- Repeated Subtraction
- Jumps on a Number Line
- Arrays

How Can I Use These?

- Whole Class Modeling
- Small Group Lesson
- Math Station or Tutoring
