Paper and Digital valentine flip book

The paper version of these flip books are so easy to assemble! Just print double sided, align, and fold!

The digital version is for anyone who might be teaching virtually. The digital version has students type out their responses – no drawing. Then the magic happens... the flip book can become interactive! **BONUS** - if you download to use as PowerPoint or PDF, the links stay in tact!

How to make this *interactive*

It's simple! You will just want to make sure that you are in "Present" mode in Google Slides, or in Slide Show for PowerPoint! Once students add their responses, they can "Present" and click on the flaps to take them to that page. Students will click on the heart to take them back to the main page. Note: Because this is a digital version of the product, it only gives students the option to write/type about the people, things, and food they love and why.

Download as PDF or PowerPoint

1. Click File.

2. Click Download.

**3. Choose PDF
(.pdf) or
Microsoft
PowerPoint
(.pptx).**
