

What's included?

- ✓ 10 ready passages
- ✓ 5 comprehension questions per passage
- ✓ Word morpheme identification task

MORPHOLOGY READING PASSAGE

Read the passage.

The Case of the Mysterious Email

Lily loved reading stories about mysteries and detectives. One day, she needed to solve a mystery of her own. When Lily opened her emails on the weekend, her inbox was full of strange messages about winning prizes. She had entered no competitions lately. Each email sounded exciting, but also suspicious.

Lily told her older brother, Adam. He looked at the emails and was immediately concerned. "You should unsubscribe from these emails right away. But be careful! Some senders might try to misinform you and trick you into clicking dangerous links."

Lily investigated. She looked at the sender's email address and noticed that many were fake. She carefully unsubscribed from the safe-looking ones and deleted the others. While working, she thought about how important it was to be respectful online and not send spam or misleading messages.

At dinner, Lily and Adam told their parents about the emails. They were proud of how the children stayed safe online.

"Good work, Detective Lily!" Adam patted her on the back.

"You did the right thing. It's always best to ask for help and double-check when you're not sure," Lily's mom said with a smile.

Identify the word morphemes.

Circle the words in the passage. Identify the morphemes.

Word	Prefix	Root	Suffix
Unsubscribe	un	sub	scribe
Misinform	mis	in	form
Respectful	re	spect	ful

Answer the comprehension questions.

Why did Lily want to unsubscribe from the emails?
She felt suspicious about them.

What advice did Adam give to Lily about suspicious emails?
To be careful when deleting them in case of spam links.

How did Lily determine which emails were fake?
She checked the email addresses.

Why is it important to be respectful online, according to the story?
So there are no misleading spam emails.

What does Lily's brother mean when he calls her a detective?
She investigated the spam emails.

MORPHOLOGY Reading Passage

Read the passage.

The Wonders of Small and Big

Have you ever thought about the connection between tiny things and enormous things? Imagine this: a microscopic creature, too small to see with your eyes, living on a leaf in your backyard. These tiny organisms, like bacteria and algae, are incredibly important for life on Earth. They help plants grow, clean our water, and even make oxygen for us to breathe!

Imagine the opposite: something astronomical, like a giant star millions of miles away in space. Stars are huge, glowing balls of gas that give light and energy to entire solar systems. Without stars, planets like Earth couldn't exist. It's amazing to think how something so far away affects our lives every day.

Between the microscopic and the astronomical, humans create incredible things. For example, a designer might invent a microscope to study distant galaxies or a microscope to see bacteria up close. These tools help us explore the mysteries of both the tiny and the very large.

No matter the size, every part of our universe plays a role in making life possible. Isn't it cool to think about how connected everything is?
