Included Skills WHY ARE WE LEARNING THIS?

- Word Problems- Solving word problems helps children apply math skills to real-life situations while strengthening critical thinking and problem-solving abilities. By learning to read a problem, understand what is being asked, and find a solution, children develop a deeper understanding of math concepts. This skill is essential in first grade, where they will tackle multi-step problems and explain their reasoning.
- Fix-it Sentences-Fixing sentences helps children develop editing and grammar skills, which are crucial for clear communication. By correcting capitalization, punctuation, and spacing errors, they learn the structure of proper sentences. This practice builds strong writing skills that will help them in first grade as they begin to write more independently.

Included Skills WHY ARE WE LEARNING THIS?

- Fact Fluency: Fact Fluency means quickly recalling basic addition and subtraction facts, which is key for building math confidence and efficiency. When children no longer rely on counting for simple math problems, they can focus on solving more complex problems. In first grade, strong fact fluency supports learning strategies like making ten, doubles, and place value operations.

- Addition with Number Lines: Using a number line helps children develop number sense by visually showing how numbers increase as they move forward. This strategy builds a strong understanding of addition by allowing children to "jump" from the next counting skills and first grade, an important more complex subtraction.

Kindergarten HOW DO I USE THIS CURRICULUM?

- This workbook is part of a larger curriculum bundle. The curriculum builds in skills and reviews previously learned skills to reinforce learning. If you would like to purchase the bundle it can be found in my shop!
- Utilize the curriculum map to see the monthly skills. The plan is also broken up by weeks within the workbook to help you set a focus for each week.
- I would do a few pages per day M-TH and then I would use Friday to finish and review to start the next week fresh! I purposely make weeks 1 & 2 a bit heavier each month so that you can make sure you are caught up and ready to start each month fresh & you can add activities that your child/children may need additional practice with.
- Introducing the alphabet and numbers happens quickly because most children have been exposed to these. If your child has not mastered these skills and is struggling to keep up, you may want to slow down or try starting with my Preschool Curriculum.
- It is a good idea to keep all of the sight word flash cards and continue to practice them until mastered. The December packet will introduce reading decodable sentences and include sight words from the beginning of the curriculum. These will continue monthly and get more difficult with each phonics skill introduced.
