## Rainproof House or Coat

Design a house or a coat that does not get wet when it is raining. Use the pictures as inspiration. Make a drawing of your house. Or collect materials in nature and make a collage.

Feathers of the kiwi bird

Platypus

New Zealand fur seal

## The Koala Life Cycle

1. A newborn koala looks like a pink jellybean. Joeys are born hairless, and blind. They lack ears.

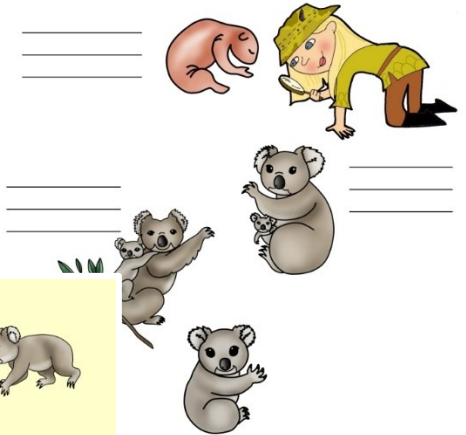

4. When the joey is about 6-7 months old he emerges from the pouch and begins to eat fresh leaves.

2. The joey attaches itself to one of the two teats inside the pouch.

3. Baby koalas start eating pap towards the end of the time in the pouch.

- ❖ Science Projects
- ❖ Biomimicry
- ❖ Thinking Challenges
- ❖ Independent Work
- ❖ Creativity Challenge
- ❖ Early Finishers

# REVIEWS PLATYPUS LIFE CYCLE

This is a fun activity for learning about life cycles! It was a great addition to my Science lessons!

I bought this for my daughter to work at home. She had to do a research on interesting animals, and she wanted to do it on platypus. She enjoyed learning about platypus using the different activities included.
