MAKE YOUR OWN AMAMOGRAPH

Teaching notes and video included

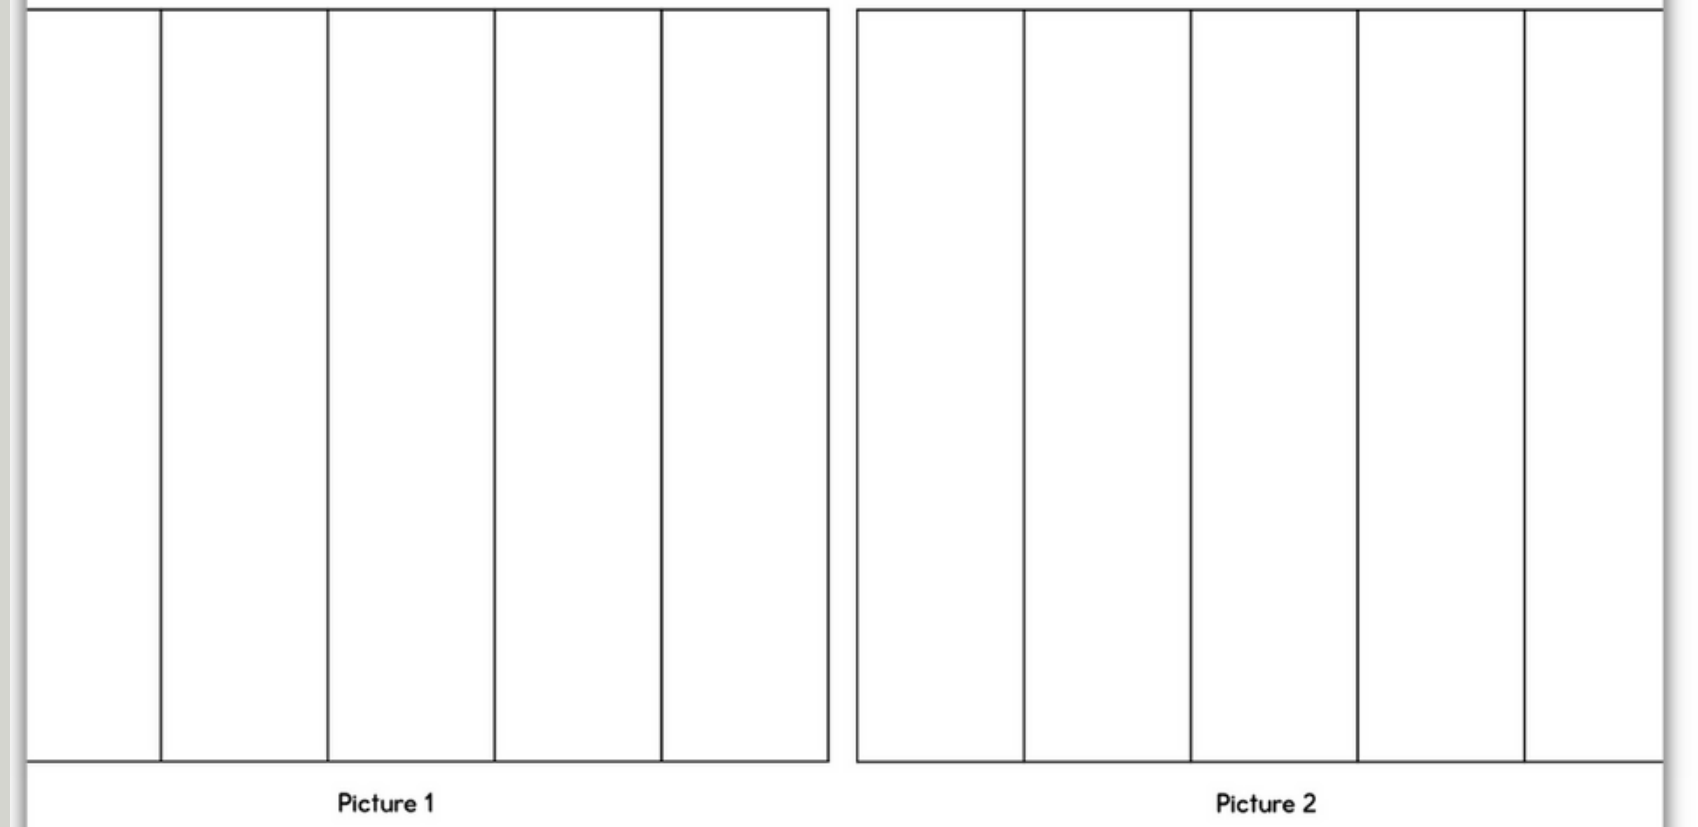

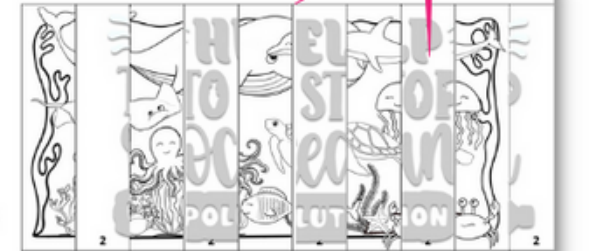

While your students explore the wonders of Agamographs, they'll also be honing essential skills. This activity encourages attention to detail, fine motor skills, and an understanding of spatial relationships—all in a fun and interactive way.

Create your own environmental AGAMAGRAPH

1. STEP 1- Draw a healthy environment in the square that says "Picture 1"
2. STEP 2- Draw a picture of pollutants or create a logo/poster with bubble writing that encourages people to care for the environment in the square that says "Picture 2"
3. Cut each of your pictures along the lines in each, making sure to keep them in order.
4. Paste your images onto the master sheet (see right)
5. When your images are pasted onto the sheet alternately as shown in the example, then fold along the lines to create the optical illusion. (When you look at your picture from one angle you will see picture 1, change angles and you will see picture 2)
