

THE *Sweet* LIFE OF PRIMARY

Digital NUMBER WALL

DIGITAL **NUMBER** WALL

This digital number wall is perfect for students building their number sense skills and gives them access to different representations of numbers they work with on a daily basis!

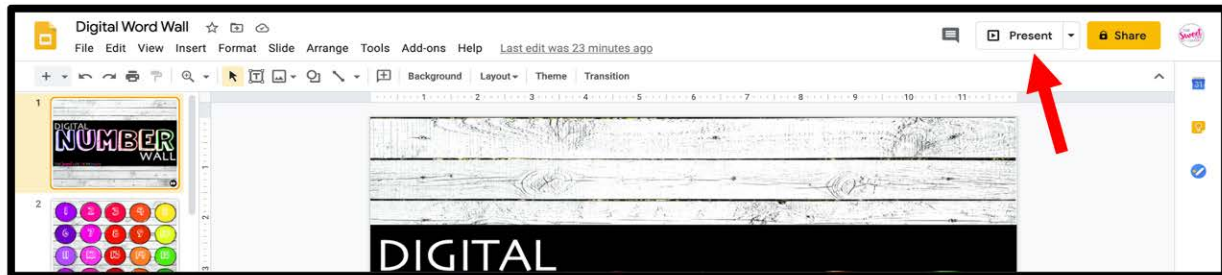

This interactive digital number wall has all numbers 1-20 linked to a slide with nine (9) different representations of that number. There are also linked backward, forward, and home buttons/icons, so students can move about the slides in the order they like/need. This digital number wall can be given to students in Google Slides, shared in Google Classroom with a link, be put on your Google Site(s), or even downloaded as a PDF. If giving this resource in Google Slides, you just have to make sure that you are in "Present" mode.

To use this resource in presentation mode only, just [CLICK HERE!](#)

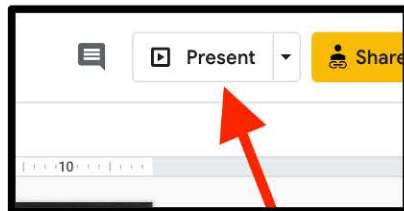

DIGITAL NUMBER WALL

How to make this resource interactive.

You will want to make sure your students are in "Present" mode.

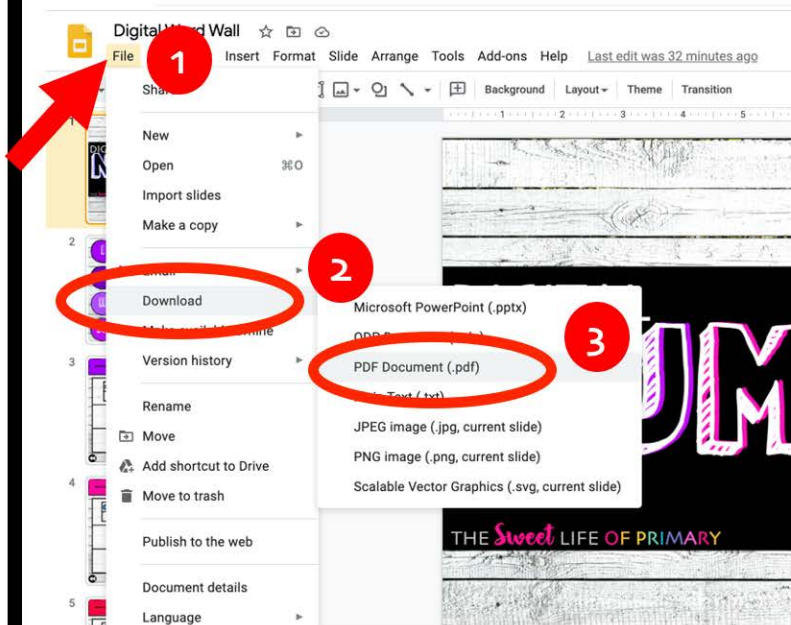

"Present" mode will make all the links active, so all students need to do is click on the number they want/need.

DIGITAL NUMBER WALL

PDF Version: If you prefer a PDF version, follow the steps below!

1. Click on File.
2. Click on Download.
3. Click on PDF Document (.pdf)

Even as a PDF file, the clickable links stay in tact, keeping the resource interactive!

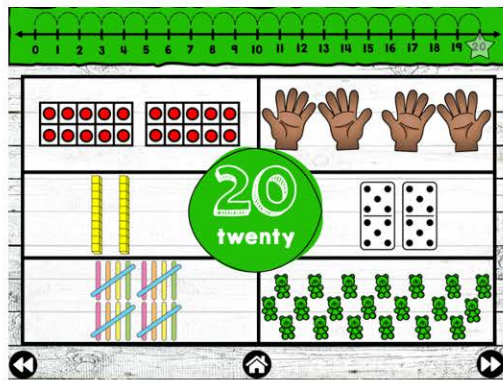

DIGITAL NUMBER WALL

How to make this resource interactive.

You will want to make sure your students are in "Present" mode.

Students will click on a number. This example shows what will happen if a student clicks on the number 20.

Then students will be taken to the corresponding number page/slide, where they can find the different ways to represent the number.

DIGITAL NUMBER WALL

These icons are included on each slide so students can easily navigate through the digital number wall. The backward arrow will take students one slide back, the forward arrow will take students one slide forward, and the home icon will take students back to the home slide with all the numbers 1-20.
