**ANIMAL
SUPERPOWER
REPORT**
Scary, Unique & Creepy

I hope you are ready to tackle the frightening looking shoebill with piercing eyes. This prehistoric-looking tall bird has a large beak that looks like a Dutch clog. The beak is perfect for catching and carrying large fish. It lives in the swamps and wetlands of Central and Eastern Africa. Shoebills make clattering hollow noises but most of the time they are silent.

Biomimicry Strategies

Print out the large illustration of shoebills and let your students fill in the biological strategies – superpowers.

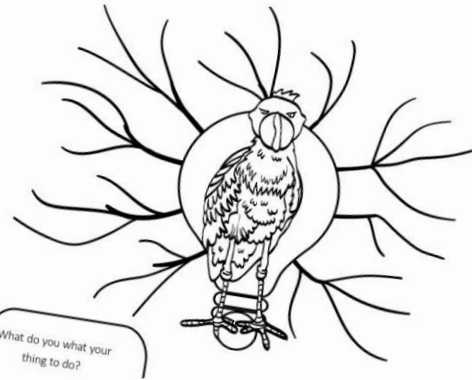

The most exciting part of using Biomimicry is to use the knowledge to explore ways to use the nature as inspirations for solving problems.

There are mind maps where your students can explore ways to use what they have learned to invent and create solutions. Drawing sketches and building models is a great way to use not only creative but also to use critical thinking skills. Does the idea work? Why? Why not?

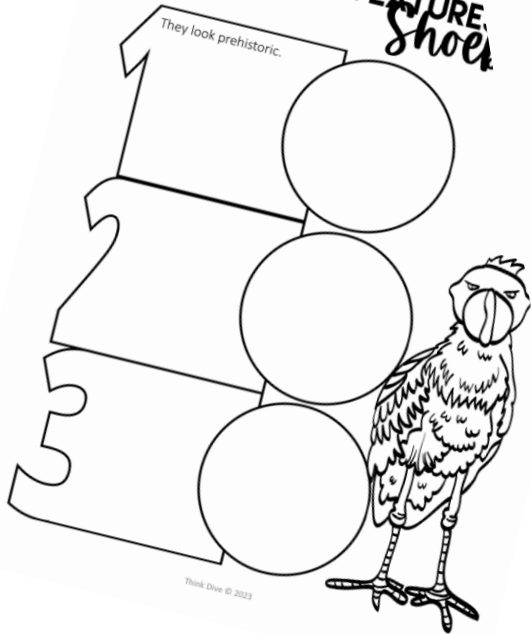

SUPERSMAART SHOE BILLS

Fill in the mind map with interesting ideas using shoebills as inspiration

UNIQUE FEATURE Shoe

They look prehistoric.
