

EARTH & SPACE BUNDLE

This unique bundle combines looking at the environment on our Earth with a resource where students are asked to design a Recycling Station on the Moon. Included are resources that support **looking at our environment from a range of different perspectives.** Designing a Moon City complete with Recycling Station is a great way to encourage students to think a bit wider about the importance of caring for an environment.

REVIEWS

“I love that the activities were not only fun and interactive but well planned, organized and followed the standards! Loved the variety of skills and activities included, too!”

Discover the importance of trees, enjoy a taste of problems with establishing a Moon City and explore how changes in climate will affect animals. Discuss solutions and explore ways to minimise the effects of climate change. These are just SOME of the activities included in this bundle!
