Conclusions

AIM :

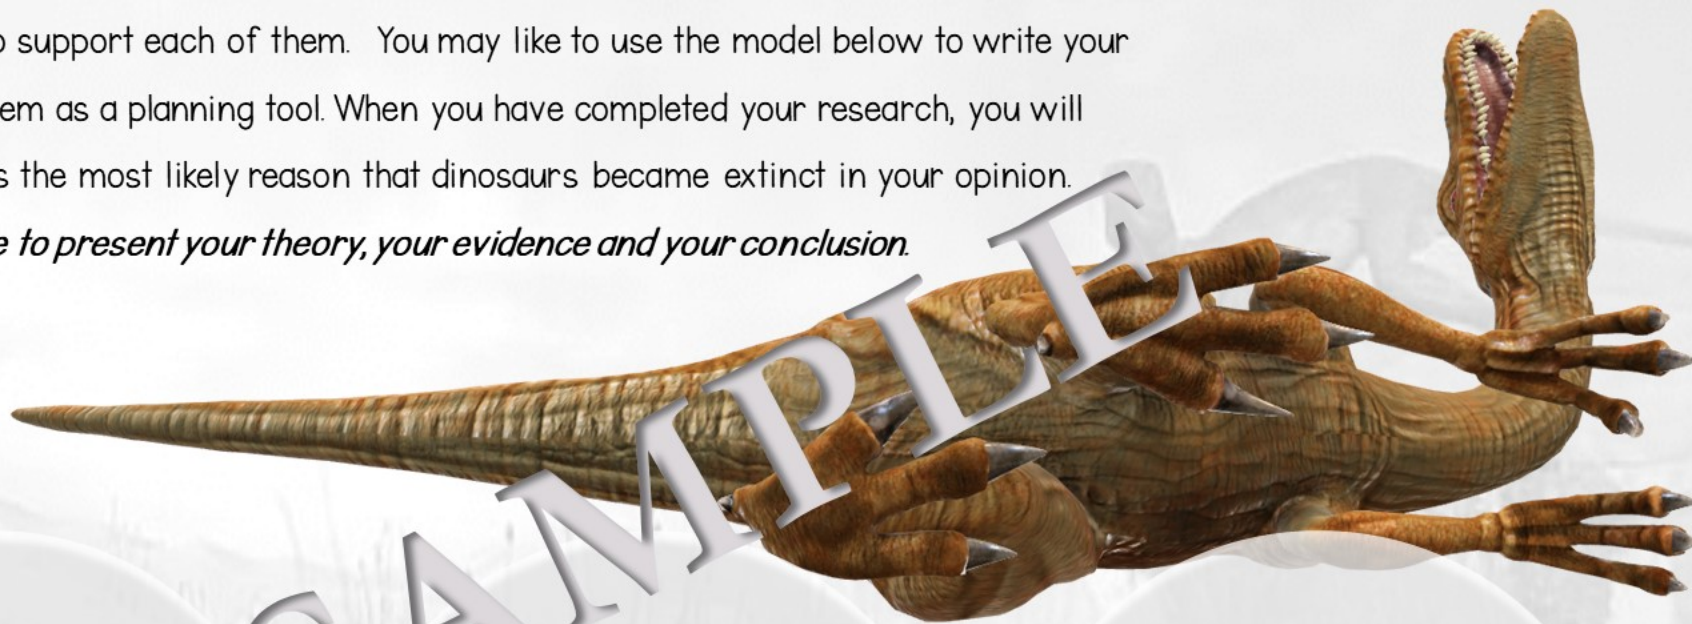

You must research 3 reasons as to why dinosaurs may have become extinct, you must include evidence to support each of them. You may like to use the model below to write your findings and use them as a planning tool. When you have completed your research, you will decide which one is the most likely reason that dinosaurs became extinct in your opinion.

Your project will be to present your theory, your evidence and your conclusion.

Research

Once you have done your research it is up to you to decide how you want to present your research.

*You have a choice of options on the next page.

*Decide which format you want to use and gather all the tools and materials that you will need to complete your task.

*There are templates available if you would like to use them.

Presentation of your report

Once you have explored the references supplied you must decide on a format for your presentation. The choice will be yours.... You may choose any of the following:

- Handwritten
- SWAY
- PowerPoint
- iMovie or Green screen video
- App of your choice

You **MUST** include your chosen theory and support your choice in your presentation.
