NAME: _____

Job Title: _____

Job Description/ Summary: _____

Career Outlook/ Projections: _____

Required Education/Skills: _____

NATURAL GAS

- Natural gas is found in different rock formations beneath Earth's surface. It can also be found near other energy resources like coal and oil. Natural gas is commonly extracted through hydraulic fracturing (fracking). From 2015 to 2025, the amount of natural gas used to supply the United States increased from 20% to closer to 23%.
