animals!

Name: _____ Ocean Animals L3

shark

Sharks are large, stealthy fish.
Sharks have sharp teeth to help them eat.
They can swim fast with their powerful fins.
They eat fish and other sea creatures.
Sharks live in the ocean.
Sharks like to hunt for fish.

Name: _____ Ocean Animals L3

crab

Crabs are active crustaceans.
Crabs have strong pincers and a hard shell.
They can walk sideways.
They eat small animals and plants.
Crabs live in the sand or rocks near the water.
Crabs like to look for food to eat.

Name: _____ Ocean Animals L3

stingray

Stingrays are curious and playful sea animals.
Stingrays have flat bodies with no bones.
They can glide through the water.
They eat small fish, squid, clams, and shrimp.
Stingrays live in shallow, ocean water.
Stingrays like to bury themselves under sand.

Name: _____ Ocean Animals L3

jellyfish

Jellyfish are saucer-shaped invertebrates.
Jellyfish have long, stinging tentacles.
They can stun their prey before eating it.
They eat fish, shrimp, crabs, and tiny plants.
Jellyfish live in every ocean around the world.
Jellyfish like floating around and eating food.

Name: _____ Ocean Animals L3

squid

Squid are soft-bodied mollusks.
Squid have eight arms and two tentacles.
They can squirt ink to escape predators.
They eat small fish and shrimp.
Squid live in every ocean in the world.
Squid like to swim quickly and look for food.

10 animals!

Name: _____ Ocean Animals L3

octopus

Octopuses are clever mollusks with no bones.
Octopuses have eight long arms.
They can squirt ink and change colors.
They eat crabs, clams, snails, and small fish.
Octopuses live in every ocean in the world.
Octopuses like warm, tropical waters.

Name: _____ Ocean Animals L3

starfish

Starfish are marine invertebrates.
Starfish have no brain or blood.
They can grow back lost arms.
They eat clams, oysters, and mussels.
Starfish live to be around 35 years old.
Starfish like to open shells with their tube feet.

Name: _____ Ocean Animals L3

manatee

Manatees are gentle, aquatic mammals.
Manatees have a paddle-shaped tail.
They can propel forward with their tails.
They eat algae, weeds, and seagrass.
Manatees live in freshwater and saltwater.
Manatees like to eat plants in warm water.

Name: _____ Ocean Animals L3

orca whale

Orca whales are members of the dolphin family.
Orca whales have a large dorsal fin.
They can use echolocation to communicate.
They eat walrus, seals, penguins, and sharks.
Orca whales live in every ocean in the world.
Orca whales like to hunt their prey in pods.

Name: _____ Ocean Animals L3

sea turtle

Sea turtles are large, air-breathing reptiles.
Sea turtles have strong flippers and a shell.
They can stay underwater for hours at a time.
They eat a mix of aquatic plants and animals.
Sea turtles live in tropical and subtropical seas.
Sea turtles like to feed, dive, float, and rest.

Name: Evelyn Ocean Animals L1

sea turtle

Sea turtles have hard shells, flippers, and webbed feet. There are seven types of sea turtles in the world. They eat jellyfish, fish, and plants. Some travel long distances. It's important to help protect sea turtles.

1) What does a sea turtle have?

☐ hard shell ☐ webbed feet

☐ flippers ☒ all of these

2) How many types of sea turtles are there?

☐ five ☒ seven

☐ six ☐ eight

3) What do sea turtles eat?

☐ jellyfish ☐ fish

☐ plants ☒ all of these

Name: Harper Ocean Animals L2

jellyfish

Jellyfish are sea animals that gently float in the water. They have long, wiggly tentacles that they use to catch tiny fish and plants to eat. It's important to be careful around jellyfish because some of them can sting.

1) What do tentacles help jellyfish do?

Tentacles help jellyfish catch food.

2) What do jellyfish eat?

Jellyfish eat tiny fish and plants.

3) Why is it important to be careful around them?

We should be careful.
