DESIGN CHALLENGES

Why do we need biodiversity?

What do you like about nature?

Why do humans need nature?

Why is biodiversity important?

Importance of Nature & Biodiversity

Nature is important for humans since we need fresh water and clean air. Also, we need plants and animals for food.

We need a world that is full of variety. Different animals and plants in a place help to make this place stable and sustainable.

Each species, no matter how small, play an important role in an ecosystem.

perfect place for us and all animals and plants

in the term biodiversity.

the life where you live.

Biodiversity Facts

Biodiversity is all the different kinds of life you will find in one area—all the animals, plants, fungi, bacteria, and habitats.

Biodiversity is important for us as well as the ecosystem.

Ecosystems are an area where plants, animals, and other organisms, as well as weather and landscapes, work together to support life. They form a bubble of life.

The term biodiversity is a contraction of what words?

Give some examples of ecosystems.

GREAT TO USE FOR

- ❖ Environment Projects
- ❖ Nature Studies
- ❖ Earth Day
- ❖ Biomimicry
- ❖ Art
- ❖ Thinking Challenges
- ❖ Independent Work
- ❖ Creativity Challenge
- ❖ Early Finishers

REVIEWS PLATYPUS LIFE CYCLE

This is a fun activity for learning about life cycles! It was a great addition to my Science lessons!

I bought this for my daughter to work at home. She had to do a research on interesting animals, and she wanted to do it on platypus. She enjoyed learning about platypus using the different activities included.
