

Subitizing and Number Recognition

Pre-K & Kinder Activity

8

Search & **FIND**

Subitizing & Number recognition

How do I use this?

- Print & Laminate the pages
- Children will pick look for the number labeled on the corner of the page. Use two colors of pom poms or bingo chips to cover:
- Numbers: Color 1-Shows the number in the corner, Color 2-does not show the number in the corner
- Tip: differentiate by only using a few numbers per day till they master these. This will help it to be less overwhelming. If you are using my preschool curriculum you may have introduced numbers 1-10 and should be able to use all of these depending on your child's development.
- Interested in the no prep curriculum? Shop on [TPT](#) or [ETSY](#).
