ALL ABOUT MY SUMMER IN NUMBERS

Think of your summer holiday and the number of times you did or did not do something. Can you turn that into a number sentence? For example, you did not go to the beach, which could be written as the number sentence $12 - 12 = 0$, or the number of times you had ice cream was nine, so you could write it as $3 \times 3 = 9$.

Activity	Number of times	Number sentence

REVIEWS

I recently explored the "Unique Plant Activities | Changes Climate & Environment | Creative Science" and found them to be incredibly engaging and educational! The activities are well-thought-out and provide a creative approach to learning about plants, climate change, and environmental science. My students were fascinated by the hands-on experiments and interactive lessons, which made complex topics more accessible and fun. This resource is perfect for sparking curiosity and encouraging critical thinking about our environment. Highly recommend for any teacher looking to bring science to life in the classroom!
